Clive Optimistic of Future

Her Citizens Prepare for Better Business, as the Farmers of Valley Harvest Bounteous Crop

The Town of Clive is one of the oldest settlements in Central Alberta, is the trading centre of the famous Pleasant Valley district. When the settlement of Clive started, the nearest town was Lacombe, thirteen miles west on the C. & E. railway. Soon afterwards the railway was extended east, but no provision was made by the railway company for a townsite. The farmers and business men realizing the importance of their district and the amount of business that it would produce, got together and elected a committee of five members to pick out a site and to negotiate with the railway company. After five years of effort it was made apparent to the company that the district was entitled to a siding, but it was necessary for the committee to practically guarantee the earnings before the company would act. It was also necessary to purchase a townsite and also pay the company a sum sufficient to build the siding, making a total expenditure of about $12,000.

The residents of Pleasant Valley deserfe great credit for the manner in which they took hold of the proposition, some furnishing teams and men, and some giving cash donations to help along the work of making the new town. The land for the townsite was donated by four farmers: Mrs. Philippa Gross, J. N. and R. N. Longstreet, and N. V. Joslin. The committee in charge of this work was composed of B. F. Allison, H. J. Northcott, Geo. H. Reynolds, D. V. Pringle, and N. W. Meadows, later substituted by N. W. Meadows, William Morton, J. T. Reynolds, R. N. Longstreet, J. N. Longstreet and A. C. Johnstone, and to the untiring efforts of these men the Town of Clive owes its existence.

In the fall of 1910 the first trains stopped at Clive and it took its place among the farming towns of the Canadian North-West. Since then it has had a steady growth until at the present it is a thriving centre with hotel, stores, garages and all that goes to make a modern town.

Pleasant Valley, from which Clive draws the bulk of its trade, is known to be one of the best agricultural districts in Alberta. It is noted for its fertile soil, natural rain fall and good water, and mixed farming is its chief industry. Some of the Province's largest pure-bred cattle breeders are located here.

The Valley is well supplied with good roods in every direction, which are always kept in good condition, well graded and ditched, the work being looked after by the M.D. Councillors.

In the matter of education ample provision has been made by the citizens of Clive and the people of the surrounding districts. Their attitude in this respect has been governed by the consideration that the first business of a democracy is the education of its potential riitizens. This means, that not only those most favorably situated may have the opportunity of educational development, but that every individual may have that greatest of all rights during his childhood and adolescent years. This feeling has been the dominating motive in the provisions made, and with the help of the Educational Authorities of the Province, it may truly be asserted that the rural schools in the vicinity of Clive are a credit to the ratepayers and those responsible for their maintenance.

Clive boasts of a modern four-roomed public and high school, three rooms being at present occupied. Student may avail themselves of all grades up to XI. G. Vanderuyl, is principal, and has as assistants Miss W. Johnston and Miss N. Bagley.

An energetic Council looks after the interests of the community. It is composed of W. C. Bachor, Mayor; C. M. Coote and Percy Shove, Councillors. H. B. Scott is Secretary-Treasurer. He reports the financial condition of the municipality to be first class.

The School Board is composed of E. L. Reynolds, H. M. Dilts, and L. W. Ditsler.

Facilities for shipping grain are of the best, four elevators being at the disposal of the farmers. Alberta Pool Elevator in charge of W. Murdoch; Alberta Pacific, with H. Jeynes as manager; Searle Grain Co., represented by J. Harrow, and the U. G.G. Elevator in charge of Mr. Coulson. A very large amount of grain is shipped from Clive every season.

The C.P.R. has as agent in charge at Clive, H. Tompkins.

Clive has an up-to-date Creamery, owned and operated by W. C. Bachor. The Clive Creamery is equipped with the very latest butter making machinery, and has a province-wide reputation for fine products.

The Pioneer Store, owned and operated by D. W. Wilson, carries a very complete stock of groceries, privisions, and everything for the needs of the home. Mr. Wilson has been in Clive for many years, and reports business very good.

G. Scott operates the Red and White Store, where a full line of high class groceries is always carried, and splendid service given.

H. M. Illsley conducts a large general store, where groceries, provisions, clothing and dry goods of the best are carried.

T. C. Worden Hardware, carries a complete line of shelf and heavy hardware and builders supplies, paints, oils, etc.

Chas. Henn, who has been in business in Clive for over twenty-five years, carries on a harness and shoe repair business. He reports that tractors and autos have not affected the harness business to a very great extent, and that business is fair with him.

Clive boasts of a first class Hotel, owned and managed by Frank Sloan. The King Edward is very highly spoken of by the travelling public, who are always sure of a good meal and clean, comfortable room at this hostelry. The King Edward is fully licensed.

Travellers may secure a good meal at the White Cafe, under the management of Mrs. C. Dean, who supplies the very choicest market supplies at most reasonable cost.

A. Heald, is manager of the Progress Lumber Co., where everything in lumber and building material may be procured. He carries a well assorted stock of everything in lumber.

In addition to looking after the medical needs of the community, Dr. W. M. MacNab conducts a Drug Store, where a full line of drugs, patents, toilet supplies, etc., is carried.

Norris Harris looks after this transfer business for the town in a most capable manner, and also conducts a livery barn for the convenience of the farmers.

Gus Bachor, owner of the Clive Meat Market, keeps the community supplied with the choicest in the line of meats. In addition to fresh meat, he carries a large stock of smoked hams, bacon, etc.

Farm Implement Companies are well represented in Clive, and all report greatly improved business this season. The International HarvesterCo., has H. M. Williams as their representative. W. C. Bachor represents the John Deere Plow Co., and carries a complete line of this company's products and repairs. H. M. Illsley looks after the interests of the Cockshutt Plow Co., and T. A. Brereton is local representative for the Massey-Harris Company.

Mr. McCormick conducts a barber shop with a News Agency in connection, and another barber shop is conducted by H. Morgan.

To take of those who wish to pass a pleasant hour knocking the balls around, A. R. Wickenberg, offers an opportunity in his Pool and Billiard Hall.

Percy Shove, in addition to his other activities, looks after the interests of the community in the blacksmithing line. He has a good plant and caters for any kind of work in his line.

An up-to-date Garage and Service station is operated by McKelvie Bros. Here you may be assured your auto will receive careful consideration, and all repairs made in a workmanlike manner. They are prepared to do all work in connection with your car troubles.

The Imperial Oil Co. have storage tanks here, with H. M. Illsley as Agent.

H. B. Scott, operates the Scott Agencies, where general Insurance and agency business is carried on. He represents several of the leading insurance Companies.

T. A. Brereton, an old "land mark" of Clive, deals in real estate, insurance, etc., and also does a general agency business, repressenting many of the leading insurance companies.

C. M. Coote is postmaster, and also agent for the Government Telephones.

Clive is well supplied with church facilities. They have the United Church, with Rev. W. B. Leard, in charge; the Baptist Church, the Church of England. The two latter are supplied from Lacombe.

Clive Community Hall is one of the real amusement places of rural Alberta. This hall is splendidly efuipped for the putting on of plays, motion pictures, dances, etc., and is the meeting place for the Valley. It was built by popular subscription and is a credit to the community.

Clive boasts of one of the best brass bands in Alberta, and has a baseball team that has made a record for several years.

Light and power for Clive is supplied by the Calgary Power Company.

A word about the fortunate situation of Clive as respects beautiful scenery. It is not by chance that valleys such as Pleasant Valley, Long Valley, and Spring Valley were named, for all might justly be called Happy Valleys, and are not only peopled by happy and prosperous families, but by the fairies of the seasons. Here are seen, by the silvery creeks, crocuses of early spring, the profusely rich blooms of the early summer, the many and varied fruits of the season. Autumn blends her richer tints along with her ripened grain, while winter holds aloft on bush and tree her many colored crystals. Surely it is here that "Pleasure loves to pay tribute to ease." These scenes alone, however, do not exhaust the ministry pleasure. Within an hour's run by automobile can be seen an interesting series of small lakes, fitly known as Chain Lakes, and resorted to by all who swing the angler's line. By far the larger lakes are Buffalo Lake, due east of Clive, and Gull Lake, due west. It is the latter place which furnishes unlimited pleasure, with its seventeen miles of water and exquisite beaches of sand.

The Western Globe wishes to thank T. A. Brereton and other old-time residents of Clive for much of the information given above.

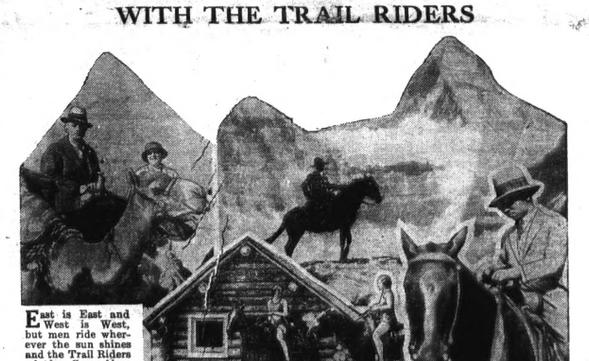

Boxing Events at Lacombe

Arrangements are now completed for the biggest boxing tournament in the history of Central Alberta, to be held in the Lacombe Arena on Friday, September 30th. Among the exponents of the art of "cuff and smite" who will tangle in this monster match are Fighting Bob Fox, former light-heavyweight champion of Canada and Lefty Boehlke, two great fighters, who have met before. It will be remembered by fight fans that Boehlke won a decision over Bob Fox at Clive this summer. Fox is out to win this fight and redeem his laurels. Boehlke, though he is not a veteran in the ring, is making a good name for himself, having fought only 15 fights and won 15 decisions. Box Fox, a wiley old veteran of the "roped-in square" is a real fighter, and his victories are many. He is well versed in the lore of ringcraft, and will give any opponent a real battle. These two fighters will be matched in the main bout, which is scheduled for 12 rounds. Clive Sissons and Guy Mosely, who battled to a draw at Ponoka on Sept. 5th will clash here, and if they put up a fight equal to the Ponoka encounter, it will be well worth seeing. D'Arcy Clayton of Wellesden Green and Baden Whitesides of Penhold, both fighters of merit will be seen in action in a 3-round battle, which should be good. Pete Hohn, of Stettler and Dick Whitesides, of Ponoka, should put up a real 3-round fight. D. Wells, of Penhold and Slippy Kisch, Lacombe, are on the ticket, and from reports of these two an intersting bout is in prospect. Fred Doberstein and Lyal Campbell, both of Lacombe are drawn for a three-round mix and as both are well-known fighters, many will want to watch them exchange upper-cuts. Last, but by no means least on this ticket is a bout between Sonny Frizzell, who weighs all of 48 pounds, and Freddy Slater, who tips the beam at 50 lbs. Sonny Frizzell, in an interview with our sport writer intimated that he is confident of a win over his heavier opponent. He tells us that in this fight game, size isn't everything and that the "bigger they come the harder they fall". He says that despite the difference in his opponents weight he has the fight "in the bag." Freddy Slater, explains to us that being heavier has its advantages, and that although he is slightly overweight, he expects to get down to Sonny's weight by extensive training, in time for the fight.

The Red Deer subdivision of the R.C.M.P. has been merged with Edmonton and Calgary headquarters, according to announcement Thursday by Major-General J. H. MacBrien head of the R.C.M.P., at Ottawa, which was confirmed by Major Acland, acting R.C.M.P. head for Alberta. Inspector Humbey, who has been in charge at Red Deer, has been given two month's furlough.

John A Machray, K.C., former bursar and chairman of the board of governors of the University of Manitoba, made his first appearance in provincial police court Thursday, and heard a charge read against him of theft of $901,175. The case was remanded until Sept. 15th, as Mr. Machray is in very poor health, suffering from cancer of the stomach.

WITH THE TRAIL RIDERS

East is East and West is West, but men ride wherever the sun shines and the Trail Riders of the Canadian Rockies, with a membership which girdles the globe, are creating widespread interest with their plans for their 1932 expedition from Banff to Mount Assiniboine, through some of the most beautiful country in the great mountains from which they take their name. The famous peak, with its many adjoining lakes and valleys, was the focal point of the 1927 trail ride and this year's trip, starting on July 29, will follow generally the same lines, with nights spent in camp, according to the best traditions of the Order. Ample time will be given for exploring the territory traversed, the ride occupying five days and traversing Brewster and Allenby Creeks; Assiniboine Pass and the shores of Lake Magog to the great mountain, which is the objective of the riders. Return will be made through the Valley of the Rocks; the Golden Valley; Citadel Pass and so through Sunshine Camp to Banff once more. The pictures shown above are distinctly interesting and show Lt. Col. Phil Moore, president of the Trail Riders, and Mrs. Moore, on camel-back at the Pyramids, during the world-cruise of the Canadian Pacific liner "Empress of Britain", in strong contrast to the cowboy viewing Mount Assiniboine, where this year's trail ride leads. Inset is H. M. King Prajadhipok of Siam, who proved an enthusiastic trail rider during his visit to Canada last summer. Below, two fair bathers are seen setting out from one of the cabins at Assiniboine Camp.

Everybody Helped

During the latter stages of the Imperial Conference sections of the press and certain news reports from Ottawa tended to create a one-sided impression of the gathering. The impression was that Mr. Bennett suddenly entered the conference in earnest, as a kind but stern schoolmaster would enter a rowdy classroom, chided the delegates upon their fractious behavior, guided their wandering thoughts into the correct channels and, to mix the metaphor, like Moses led them out of the land of the Pharoahs.

It is unfair alike to Mr. Bennett and to most of the delegates for such an impression to be created. The intelligent man who knows something of the calibre of many who attended the conference is annoyed at the insult to his intelligenre implied by news reports and comments which create the above impression. He knows that Mr. Bennett was emphatic—he is rarely anything else— but he knows that others were emphatic also.

Mr. Baldwin, indeed, found occasion at one time to speak as follows:

We do not believe Great Britain would have stated the hard facts if the dominions had not asked so much and apparently been so oblivious of what they were already receiving. There seems no limit to their pretensions. A few months ago they were freely granted valuable preferences Today they wish not only to increase them but to place limits on their foreign competitors, exhibiting a strange blindness to Great Britain's world-wide status and position as an international trader. The dominions should beware of proposals that must damage the foreign trade and the purchasing power of their best customer.

The speech is quoted not in order to stress the differences of opinion, which were revealed at Ottawa (although, obviously, had there been no differences of opinion, a conference would not have been needed) but in order to stress the fact that what success the Imperial Conference delegates attained was the work of many.

It is better for Empire goodwill that we realize this fact. To Mr. Bennett goes the credit of suggesting the conference at Ottawa, of acting as a tactful host to Canada's guests, of expressing the Canadian stand is foreful language and—most important of all—of making certain concessions which the situation demanded. And the credit is great enough to make their idiotic and extravagant eulogies quite unnecessary.

INTERESTING ITEMS FROM OUR RURAL SETTLEMENTS

Ponoka Notes

A quiet wedding was solemnized in Edmonton on Tuesday, August 23rd, by the Rev. Philip Duncan when Jean Stewart, third daughter of Mr. and Mrs. W. A. Stewart, of Menaik, was united in marriage to Archie Beck, youngest son of the late Mr. and Mrs. Jacob Beck, of Ponoka.

How is this for garden produce? Mr. Chris. Schmidt called at the Herald office with a sample of vegetable. He had a pumpkin weighing 21 lbs, and measured 39½ inches around. He has 18 pumpkins weighing from 10 to 21 lbs., 87 vegetable marrows from 4 to 10 lbs. growing in his garden. It has been an exceptional season for garden truck and Ponoka gardens stand well ahead.

School resumed on Thursday with two new teachers and many more pupils; indeed so crowded are the rooms that every bit of space has been utilized. Thirty-six new seats have been ordered, and until their arrival high school pupils have to sit "indiscriminately" or in other words where they best can. With the school so crowded, the trustees and staff have to bring all their planning ingenuity into force, and it is hoped that the situation will rectify itself by time. At present there are 443 pupils in the school.—123 high school pupils and 320 public school pupils.

Items From Alix

The Masonic Lodge enjoyed a visit at their meeting last night from the District Deputy Grand Master, Mr. W. E. Porter of Donalda. At this session arrangements were completed for the District Meeting which will be held in Alix next month.

Large numbers of our citizens have visited the Hamer ranch this week to witness a combine in action, it being the first time that the majority of the visitors have had the opportunity of seeing one of these machines in operation.

A motel T driven by Mr. Leuck from near Castor turned turtle on the foot of west side of Papineau hill last Friday night, pinning the driver in the ditch. He lay there for over four hours, passing cars not seeing him. Eventually he was released and removed to the Lacombe hospital badly bruized and a number of broken ribs.

At the 1932 track and field meet in Red Deer on Labor Day, Mr. E. W. Cormark, of Alix won the one mile run. The entry in this race was large and E. W. made the course in 4 minutes, 53 and 3-5 seconds.

Benny Holt of Bashaw won a place in three events: 2nd in the 100 yd. dash; 3rd in the 220 yard dash and 3rd in the 440 yard dash.

In the 880 yard run, Norman Holt of Bashaw set a new Alberta record of 2 minutes 2 and 2-5 seconds.

Threshing is in full swing and the odd farmer has finished. The first wheat to be delivered in Alix this fall went to the Pool elevator from the farm of F. A. Mann and graded No. 2.

Mirror News

Mrs. J. P. Watters and daughters, who have spent the past two months with relatives at Napanee, Ont., returned home again last week.

After visiting for a week with friends at Stettler, Miss Hilma Moller arrived back home on Tuesday.

Mrs. Marshall returned to her home here on Tuesday after having spent some days visiting at Vegreville.

We understand the district meeting in connection with the I.O.O.F. is being arranged for next month in Alix.

We are pleased to learn that Mr. D. M. Jewell, whose serious accident we reported last week, is recovering, although slowly.

The farmers along Buffalo Lake have suffered to an appalling extent through the ravages of ducks and geese, thousands of which have been raiding the wheat fields. The issuing of the special permit has not met the situation as the harvesters are too busy to use it. What we require is an earlier open season. The crops have been depleted in this section, as in some cases to be hardly worth the cutting.

Conservatives Put Candidate in Field

F. P. Layton, pioneer resident of Camrose and president of the chamber of commerce, was chosen to contest the byelection in that constituency at a nominating convention of the provincial Conservative party, Friday. A former Mayor Mr. Layton has always taken an active interest in civic and provincial political affairs.

In 1917 he was a Conservative candidate in the provincial election, losing to George P. Smith, after being only 10 days in the field. The Conservative nominee was born in the maritimes 51 years ago, coming to Camrose more than 20 years ago, where he has resided ever since.

Lacombe School Fair September 26th

Special Prizes

1 Magic Baking Powder Cake.
2 Highest Points in Classes 28 to 34.
3 Highest Points in Classes 35 to 43.
4 Highest Points in Classes 80 to 85.
5 Map of Canada.
6 Writing Grades I, II, III.
7 Writing Grades IV, V, VI.
8 Writing Grades VII, VIII, IX.
9 Highest points in School Room Work.
10 Best Display of Vegetables by a School.
11 Decoratel Pony, shown by Boy or Girl.
12 Saddle Pony, by Boy or Girl.
13 Aberdeen Angus Calf.
14 Stock Judging.
15 Pr. Bacon type pig (Class 32) Mrs. L. N. Graham offers purebred Tamworth weaner pig.
16 Pail Fed Beef Calf.
17 Best Trained colt.
18 Poster advertising the School Fair.
20 Highest points in Classes 86 to 126.

Exhibits should be in by 10:30.

Club hogs are barred from School Fair.

Read the rules set out in Bulletin and Supplement.

Mrs. W. Chessor, Secretary, Phone 3906
Mrs. Jno Proudfoot, President, Phone 3611

A DISTINGUISHED VISITOR

Among the distinguished visitors at The Western Globe office this week, were Sir Knight Ole Boode, C.O.D., A.W.O.L., of the Royal House of Sweden, but now located in Red Deer, a community about sixteen miles south of Lacombe. He was accompanied by Count de Cellophane, also of Sweden, who was commissioned by the Crown Prince to come to Canada and look up a real automobile for royal family use. Learning that his countryman Sir Knight Boode was dealing in the celebrated Plymouth cars, he called on him, and being impressed with that car's beauty, was taken on a demonstration drive to Lacombe. It is altogether likely that Sweden's royalty will soon boast of a Plymouth sedan—that is if the royal treasury can scrape up the necessary filthy lucre. Sir Knight Boode reports business good, and several Plymouths have been disposed of lately. This year's Plymouth is a wonder Sir Knight will tell you. It has not got square cylinders, and the rattle of marbles under the hood, so common to many vehicles, has been totally eliminated. Full floating power is another good point in the Plymouth, and it is so easy on gas we were informed, that in the event of running short, the car will run many miles on its reputation and exhaust.

MEL PARCELS TAKES OVER CENTRAL GARAGE

The Central Garage, located right on Barnett Ave., is now being operated by Mel Parcels. The garage, which is one of the largest on the line is well equipped to meet every automobile requirement. Beside general overhaul and service work, the Central Garage handles a full line of oils, greases, gasoline, tires, tubes, etc., in fact everything needed in the operation of a car. The repair department is in the hands of Bill Thomas, an expert mechanic with many years' of experience with every make of car. A good job is guaranteed. The garage has a large storage capacity, and people intending to drive their cars this winter should see Mr. Parcels about storage. The place is steam heated, and being so centrally located is an ideal garage in which to store your car. 24 hour service is the policy of this garage, so you can get gasoline, repairs, etc., at any hour of the day or night. Mr. Parcels invites you to call around and look his place over, and if you have any car troubles just give him a trial—you will be satisfied.

The Holding Of Conferences

The holding of conferences has become such a common practice since the close of the Great War, and, considering the magnitude of world problems still calling for solution, so little has apparently been accomplished, that many people are inclined to question the utility of such gatherings and to be critical of the comparatively heavy expense which they entail. Within recent months, for example, there has been the international conference on disarmament held at Geneva, the Lausanne conference on war debts and reparations, the Imperial Economic Conference at Ottawa on preferential trade within the British Empire, and very shortly a world economic conference is to assemble at London, England. Are they worth while, and have they really accomplished anything, people are asking.

There are, of course, certain types of people who belittle all attempts to remedy evils and achieve reforms by way of negotiation and compromise. They predict failure for each conference in advance of its meeting, perhaps, in many cases, the wish being father to the prediction, because they hold to the view that the existing financial and economic system of the world cannot be remedied but must be torn up root and branch, completely destroyed, and replaced by an entirely different system founded on new principles. Others, less radical, have seemingly lost confidence in the ability or willingness of the nations to abandon their extremely selfish nationalistic policies and programmes and work together for the common good of all.

While progress has been slow, and many of these conferences disappointing in the tangible results accomplished, it would be a great mistake to regard them as failures. For example, while the world still has a long way to travel along the road of total disarmament, it is travelling in that direction, as witness the real advance made in the limitation in the number, size, and power of naval craft to be maintained by the leading maritime nations. Disarmament can only be brought about by a restoration of confidence and trust among peoples; it is a matter of education and each conference held is a mighty factor in enlightening people's mind and stirring their consciences. Each such conference helps each nation to more fully understand and appreciate the viewpoint of other nations. And this is an essential first step to definite action.

Complete failure was predicted in advance for the Lausanne conference on war debts and reparations. Of course it did not achieve everything that was hoped of it. No conference ever does, probably never will. But the Lausanne conference did, as is now almost universally admitted, accomplish a great deal and take a long step forward towards the goal of a reasonable settlement of this most vexing problem which has been an outstanding obstacle to the world's restoration to financial and economic health.

Failure was likewise predicted for the Imperial Economic Conference at Ottawa. Whatever its accomplishments,—and these will not be fully known until the details of the agreements signed are laid before the respective parliaments of the Empire,—the conference did not end in failure. It failed of course to reach all the decisions that many people desired, and, on the other hand, it failed in the eyes of others because it reached decisions to do things not acceptable to them. Where so many conflicting interests had to be reconciled, and, failing complete agreement, compromises reached, it follows that what is regarded as failure by one interest or group is acclaimed as success by the opposing group, and vice versa. Success or failure are, therefore, comparative terms. The main thing is that each component part of the Empire now understands the position, problems and economic difficulties of all other parts as never before, and each has displayed a willingness to go as far as possible in solving those problems and overcoming those difficulties. That is all gain, and full of promise for the future. The conference really sounds the death-knell of extremist trade restrictionist policies and unlocks the door of freer and wider Empire trade. This must inevitably lead to freer and wider world trade.

Finally, those who are critical and skeptical of the value of these conferences will do well to remember that in olden days nations did not trouble very much to confer about their difficulties and strive to find a way out compatible with the dignity and interests of all; rather they were glad to find even the smallest excuse to wage war on each other. The world is turning away from that barbarism, and conferences are the medium, slow and tedious perhaps, but in the final result more beneficial and lasting, replacing war. True, international conferences cost money, fairly large sums sometimes, but a mere bagatelle to the tremendous cost of war.

South Atlantic Air Mail Starting Soon

Planes Will Refuel From Ship Stationed In Mid-Ocean

The plan of the Deutsche Lufthansa for regular airplane service between Europe and South America has made such progress in recent months that the first test flights probably will be made early next year. A 6,000-ton steamer will be stationed in mid-Atlantic between Gambia, Africa, and Natal, Brazil, for a refuelling station.

The Lufthansa has shipped a Dornier-Wal flying boat of the type used by Wolfang von Gronau on his trans-Atlantic flights to the Dornier works at Friedrichshafen to be equipped with the necessary instruments. A catapulting device with which 'planes will be launched from the refuelling vessel in mid-Atlantic also is under construction.

Two Exceptions

An Irish magistrate, one of the old school, was summing up a case in a Dublin court. The plaintiff was a handsome woman, and her good-looking daughter was one of the witnesses.

"Gentlemen of the jury," said his honor, "everything in the case seems plain—except, of course Mrs. O'Toole and her charming daughter."

Tri-motor passenger 'planes are to be operated between Berlin and Moscow, half being of German make and half Russian.

Electricity is assisting in the clearing of logged-off lands in the Fraser Valley, British Columbia.

Permit Is Required

Railway Constables Check All Trains Going To Churchill

Going to Fort Churchill, the terminal point of the Hudson Bay Railway, is like a visit from Windsor to Detroit. Railway constables go through all trains en route to Churchill and ask to see the permits of the passengers. Instead of the familiar greeting, "Where were you born?" of the United States immigration men, the traveller to Churchill hears, "Permits please!"

A few hardy souls have tried to get up north without the necessary permission. But most people realize how unpleasant it would be to be stranded at Hudson Bay. It is just as well the Government exercises such close supervision. The officials have enough on their hands trying to make things go in Churchill, without being burdened with the problem of looking after a few hundred men who made their way north and had neither means of subsistence nor prospect of return.—Border Cities Star.

Sure To Be Clean

An English actor appearing at a seaside resort for a week, had some difficulty in securing accommodation. In the end he was forced to consider very grubby diggings.

Being a fastidious fellow he said to the landlady, "Are the sheets on my bed clean."

"Lor' bless you, yes, sir," replied the woman. "The last gentleman as 'ad 'em, took 'is 'swim reg'lr every Friday."

Wood impregnated with rubber is being used for some parts of violins.

Troubled With Her Children Having Summer Complaint

Mrs. L. E. Montgomery, Ave. K. South, Saskatoon, Sask., writes:—"I am the mother of two children and have a great deal of trouble with them having summer complaint, in fact, several times every Summer they were subject to attacks.

"I have found Dr. Fowler's Extract of Wild Strawberry to be the most effective remedy and keep it always handy and give it immediately on the first sign of any bowel complaint.

"Thanks to 'Dr. Fowler's' I no longer dread the Summer months."

More Divorces In West

Increase Is Shown In the Four Western Provinces

Divorce is decreasing in Quebec, Ontario, Nova Scotia, Prince Edward Island and the Yukon, but in New Brunswick, Manitoba, Saskatchewan, Alberta, British Columbia and the North West Territories it is increasing according to figures taken at the census by the Dominion Bureau of Statistics. There are in all Canada 7,441 divorced persons as compared with 7,401 ten years before. They numbered 4,400 in 1912, and only 661 in 1901.

The striking feature of the divorce situation in Canada is that in the old provinces with an older Canadian population, more homogeneous and with more of its population province-born, divorce has decreased. But in the newer provinces where there has been a larger percentage of incoming population divorce has increased. The most notable example of this is British Columbia where the proportion of those born outside that province is the greatest in Canada, the greatest increase in divorce has taken place.

The increase in British Columbia is 622 in a decade, or from 1,030 to 1652. That increase is greater than the total increase in Canada which was only 40. Alberta coming second in the category of non-province born, increased 312, or from 102 to 1,014. Manitoba, which has a greater urban population than Saskatchewan increased from 508 to 603, Saskatchewan from 570 to 667.

The increases in the four western provinces was 1,178, while the decreases in the eastern provinces amounting to 1,138. Some of the difference, of course, would be due to difference in divorce legislation.

Daring Flight Proposed

Piccard Plans To Make Balloon Ascension Over Hudson Bay Next Summer

Prof. Auguste Piccard, the only man who has looked twice upon the world from 10 miles above it, plans to ascend to the stratosphere again next summer from the northwest shore of Canada's Hudson Bay.

In some ways it would be a more difficult flight than the first two, for the winds blow across northern Canada might drop a balloon in wastes as dreary and inaccessible as anywhere on earth.

Nevertheless, as soon as the Belgian scientist has finished calculating results recorded by the instruments he will begin preparations for the third experiment.

"We plan to take off from the northwest shore of Hudson Bay, as close to the north pole as we can get," he said, recently. "Our purpose will be to complete the study of cosmic rays at a point where the lines of magnetic force penetrate the stratosphere. When we know how the rays act under these conditions we will have the answer to many scientific problems.

The professor said that he had risen nearly 55,000 feet, a point at which the temperature inside the gondola of the balloon was five degrees below zero fahrenheit, and outside 47 degrees below.

Persian Balm promotes daintiness, charm and beauty. Magical in its effect on the skin. There is nothing like it for creating and preserving a lovely complexion. Cooling, caressing, it soothes and relieves all roughness caused by weather conditions. Delicately fragrant, it enhances the most finished appearances. Makes the skin rose-leaf in texture. Truly a peerless toilet requisite for every discerning woman.

Windmills In England

Artist Discovers More There Than In the Netherlands

Windmill laureis are usually given to Holland, but facts are not in accord with popular belief. An artist of Gainsborough, in Lincolnshire, England, K. S. Wood, has discovered that England has over two thousand windmills and that there are only 1,-700 in the Netherlands. Mr. Wood is now busy painting them before they disappear. He has done 200, and while he has been at work more than one hundred mills have been pulled down. Lincolnshire leads with one hundred and seventy windmills.

Labor Wants To Earn

Bulk Of Unemployed Anxious To Do Something For Living

"Labor wants to earn its own livelihood" says William Green, President of the American Federation of Labor, in deploring the fact that more than 11,000,000 are unemployed in the United States.

Fortunately what Mr. Green says is true. One of the grave dangers of these days is that there is always a tendency that a group will arise whose members will lose all ambition and expect to be kept in ease and comfort by the state.

Logical Deduction

An admirer describes an actress as "having teeth like stars," which causes The St. Thomas Times-Journal to remark that "lots of us have molars that have been coming out at night since I don't know when." Anyway, it is an interesting comparision, and if teeth are really stars, perhaps the milky way is just some kind of heavenly toothpaste.—Toronto Star.

Remarkable Work Of Buckfast Abbey Monks

Financed Through Sale Of Honey Six Men Rebuild Church

History in a honey-pot?

Certainly—if the pot contains "Heather Honey," collected by the monks of Buckfast Abbey. For it has made possible one of the miracles of today—the building of a great abbey by a handful of men.

Fifty years ago there arrived in England a small band of German, Austrian, and French monks from the continent. They travelled into Devonshire, and settled down in the ruins of the old Buckfast Abbey.

The newcomers set to work to support themselves by tilling the land and bee-keeping, and so successful were their efforts that they were able to purchase the site on which they had settled.

At once the new owners set about the task of clearing the site and excavating the ruins. In the course of their labors they found the original plans of the building.

Progress was necessarily slow, for only two monks were employed on the work in the first instance, but later on this number was made up to six, and in 1906 this tiny group commenced work on the rebuilding of the abbey church.

Six men to build a church of noble proportions! It sounds incredible, impossible, yet in twenty-six years these six men have completed their labor of love, and this summer the abbey church was consecrated.

Apart from the preparation of the plans, which was necessarily left to an expert architect, and the statuary and stained-glass windows, the six monks have done the entire work. They have built walls and pillars, arches, vaulting, the central tower—in fact, everything that is structural.

The engineering is their work as well. One of the brothers, who knew nothing of electricity when he first arrived at Buckfast as a youth, took a correspondence course, and he it is who has installed the dynamos, the heating, and the lighting.

All that remained of the old building has been preserved in the new, and the entire work, if undertaken today, would cost at least £120,000.

The work has not gone on all these years without interruption, for the war made things difficult for the German and Austrian monks. For one thing, during the war years they were not allowed to quarry stone, but one of them learned to make concrete, and with this material carried on. Year in, year out, the building has gone on, however, and the first portion was opened in 1922.

Visitors from all over the world have helped to contribute to the cost of the work.

Today there are sixty monks at Buckfast, all of whom but the six abbey builders are engaged on various tasks.

The surrounding lands have been farmed with success, and electric current for various purposes is generated from a big water-wheel in the grounds. Some of the monks are renowned as healers of the sick in the surrounding district, and their Buckfast tonic and cough mixture is famed throughout the west.

It is the abbey apiary that is really the foundation of all this. Today there are millions of bees at Buckfast, and as much as 50,000 lbs. of honey is sold by the monks in a single year.

Soviet's Great Army May Threaten World

Two Million Soldiers Are On Active Service In Russia

Soviet Russia's army, officially numbering 600,000,000, has two million soldiers in active service and will be a threat to world peace within a decade, declares T. H. Oxnam, mining executive with the Nevada Consolidated Copper Company, who has returned to the United States after directing vast operations for two years from his offices in Moscow and Leningrad.

"With an additional three million men in reserves, Russia within ten years will be able to throw into war as many as all nations had on the French battlefields," the engineer says. The country at present lacks great munition factories. For that reason it can't fight Japan or any other power. Stalin and his 26 co-dictators are rushing industry with the main objective of building gigantic arms plants."

Valuable Bird's Nest

At Crater Lake National Park, the discovery of a "camp robber," or Oregon Jay nest, has caused a stir in ornithological circles. So rarely are they found that an eastern ornithological society has posted an award of $100 for the location of such a nest.

The oldest map in the world is said to have been found in excavations about 200 miles north of Babylon. It was buried under 20 feet of earth and pictured the layout of a rich man's estate.

Distemper responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

Grapefruit in a Park Avenue, New York, restaurant is 60 cents. But grapefruit aux marvellieux is 90 cents. This is grapefruit drenched with juice of half an orange.

Introduces New Trade

Mattress-Walker First Of His Kind, Does Good Business

A macadam road and a first-class mattress have one thing in common. But only one, of course, if the mattress is really first class.

It is, The New Yorker tells us in an editorial note, a slight crown in the middle; and out of this crown a slightly bald man named Harmon Rumzie has built an unusual career —mattress walking.

This crown, or ridge, The New Yorker tells us, "is to prevent the mattress from developing as time goes on, a gully or gulch where the sleeper's body rests." A certain lady, ignorant of this, became instantly suspicious when she received a custom-built mattress into her home the other day.

"Seeing a bulge down the middle, she thought something was wrong, and phoned the makers of the mattress to send right over." Continuing the story:

In an hour or so, Harmon Rumzie arrived, pulled the mattress on to the floor, covered it with burlap, took off his shoes, and began solemnly walking up and down on the mattress.

This prank delighted the lady and she took off her own shoes, thinking to join in. Mr. Rumzie discouraged her. He takes his work seriously.

No jumping up and down, nothing but the steady tramp, tramp, tramp, furlong after furlong till the mattress is level.

A furlong is one-eighth of a mile.

Mr. Rumzie is the only mattress-walker in the trade, says The New Yorker, as it proceeds with its account of this remarkable vocation.

He does walking in addition to his other regulation work. It would take two or three weeks of steady sleeping on a mattress to wear off the crown that Harmon Rumzie can walk off in an hour or so.

He gets two or three calls a month to go mattress-walking—more calls in summer than in winter, more calls in November than in any other month. He calls his visits "sittings."

Sometimes one sitting is enough to level off a mattress, sometimes he has to go back. He walks two or three furlongs at a sitting.

Adopt Uniform Type For Braille Readers

Anglo-American Agreement Means Wider Selection Of Books

Even the blind are wildly fond of mystery novels and detective "thrillers," according to officials of the National Library for the Blind, who have just announced the details of an Anglo-American agreement for a uniform type for all Braille books. It means that American and English blind persons henceforth will enjoy a wider range of books from which to select.

Detective stories, American crime stories, will be the chief importation of Braille books into England, it is expected. Library officials say that blind readers have a great variety of tastes, but detective stories are the most popular.

Three blind American delegates travelled to London to arrange the final details: R. B. Irwin, executive director of the American Federation for the Blind; G. F. Meyer, president, American Association of Workers for the Blind; and L. W. Bodenberg, Illinois school for the blind.

A Colony Of Dwarfs

Everything Built On Small Scale In Suburb Of Berlin

In a southeastern suburb of Berlin a colony of some fifty dwarfs has established a miniature town. Everything for the little people is on a small scale, "small houses with small rooms filled with small furniture. The inhabitants are mostly stage folk. They have recently received official recognition of their village by the postmaster-general. He has given authority for the building of a small post office to be called Zwergstadt, or Dwarf City. The midget citizens have planned their tiny houses not only for their own comfort, but to exclude persons of normal height.

Use Vacation For Study

Dutch Family Did Not Waste Year In Pleasure

During a year's vacation in Vienna, Austria, a Dutch colonial railway official and his family have been busy. The father studied decorative painting and musical instrument making. The mother and five children were awarded 24 certificates for music and technical studies. The mother also took up Viennese cooking, while one son mastered hairdressing. In addition the entire party learned German.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Eclectric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

Trains Ignore Town

Although a college town, no trains bring students to Olivet, Mich., since the advent of the motor bus and automobile. No passenger trains stop here at all. Mail is picked up from the hooks. One freight train stops daily for parcel post and express.

An Oasis: Of Beauty

New Park In the Cypress Hills Of Saskatchewan

The motrist on the south road out of Maple Creek, Saskatchewan, climbs 1,800 feet to the newly created Cypress Hills Provincial Park, an area of eighteen square miles of pine covered hills that lies twenty miles south of the town. Here have been established by the government a forest reserve and game sanctuary. The streams are clear and cool, well suited to the rainbow and Loch Leven trout fry placed in them some years ago. As a result of the wars between the Crees, Assiniboines and Blackfeet, this area became a "No Man's Land," was little hunted and became a haven for wild life, and to this day it has been a favoured spot. The traveller is hardly aware of approaching the park, until suddenly topping the crest of hills there breaks into view a beautiful scene of forest and stream. It is truly an oasis of beauty, located in the Cypress range of broken hills, scarred with deep ravines, fantastic crags and rounded elevations.

Dams placed in Belanger and Lone Pine creeks, tributaries of the Frenchman River, which loses itself across the Montana Border, have created two charming lakes, 4,000 feet above sea level, known as Loch Lomond and Lock Leven, having a water area of approximately 200 acres. In addition to rustic bridges that punctuate the woodland paths in the new park, there will be found accommodation for the vacationist that includes splendid camp sites, a sixteen room sleeping building, and a nearby kitchen house.

Perils Of Motor Fatigue

Great Risk Of Accidents When Driver Is Drowsy

Regulations now demand that drivers of motor trucks shall remain on duty for only a certain period of time, so that there may be less risk of them falling asleep at the wheel and bringing injury to themselves or others on the road. This is a sensible provision, the full force of which is revealed in the number of highway accidents directly traceable to fatigue on the part of drivers, and if it were possible for operators of private motor vehicles voluntarily to adopt the same rules, there is no doubt whatever that there would be a marked lessening in the number of traffic accidents. Safe operation of motor vehicles necessitates unceasing vigilance on the part of driver. It cannot be carried out without great risk, especially on much-travelled roads, if the driver even nods at the wheel. And if he is so overcome with fatigue that he falls asleep, the consequences may be (and very often are) most disastrous.

Ex-Kaiser Owns Church

Title To Property Has Been Held For Many eYars

Former Kaiser Wilhelm owns a church in North Bohemia. When the 75th anniversary of the German Evangelical Church of Marienbad was observed a letter of congratulations came from Wilhelm at Doorn. He made the pastor of the congregation a member of the Order of Hohenzollern.

There are two valuable windows in the church. These were presented by the Kaiser on the 50th anniversary of the church 25 years ago. Wilhelm was the exalted ruler of the German Empire at that time. He has held title to the church property for many years. That he still keeps in close touch with affairs is indicated by the letter sent the congregation for the anniversary.—London Daily Express.

The Proven Asthma Remedy. Since asthma existed there has been no lack of much heralded remedies, but they have proved short lived and worthless. The ever-growing reputation of Dr. J. D. Kellogg's Asthma Remedy has given it a place in the field of medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on effecting relief and making new converts.

Luxurious Car For Boy

Built To Order For Young Son Of Indian Prince

What is described as the most luxurious car ever built to order for a boy has been completed in England for the eleven-year-old son of an Indian prince, the Maharajah of Jobhpur. Beneath the hood is a four-cylinder motor that will drive the car 74 miles on a gallon of gas. The miniature seats, as well as the steering wheel and controls, are boy-size. In all respects save one the car might typify the fondest day dream of an average boy. The Maharajah has ordered special gears installed that will limit the driver's speed to 15 miles an hour.

Ahead Of Dominions

It may amaze some people to learn that the value of the output sold off the farms of the United Kingdom exceeds that of agricultural production in either Canada or Australia. For the average pre-depression year, it is estimated by a writer in the London Times at £300,000,000 as against £375,000,000 in the Dominions mentioned.

The nest of an American eagle weighs from 10 to 12 pounds.

WOMAN LOSES 28 lbs.
Trips Upstairs Like a 2-Year-Old

A woman writes:—"Three months ago, after much argument, I was persuaded against my will to try Kruschen Salts to reduce my weight, which was 222 lbs. I had tried other things, but all to no avail. After three weeks of Kruschen I had lost 5 lbs. 4 ozs., and I felt five years younger. I really must say I feel a different woman. My age is 37 years. I have now lost 28 lbs. to date, and while before, to go upstairs was a great effort, now, as my husband says, I trip up like a two-year-old."—(Mrs.) S. G. B.

Kruschen Salts keep the system free from encumbering waste matter. Unless this wastage is regularly expelled it will give rise to rheumatic and other body poisons. And Nature is liable to take the defensive measure of storing this poison-breeding material out of the way in the form of fatty tissue. Unlike most salts, Kruschen is not merely a laxative. It is a combination of six salts which have a tonic influence upon every organ, gland, nerve and fibre of your body.

Reward Wheat

Is Finding Favor In a Number Of Saskatchewan Areas

Reward wheat is finding favor in an increasing number of Saskatchewan districts according to Prof. J. B. Harrington, professor of field husbandry at Saskatchewan University. Several farmers on the heavy soil north of Moose Jaw report better yields from Reward than Marquis.

At Krydor, Dr. Ramsay, extension worker of the University of Saskatchewan, found that Reward wheat was replacing Garnet in favor. The Garnet wheat had lodged badly and shows considerable rust this year, particularly in the lodged spots. The Krydor district had a heavy crop and cutting was well advanced.

Dr. Harrington has returned from a trip of 1,800 miles in the province chiefly undertaken to compare tests made of Reliance wheat and Marquis wheat grown side by side at a number of points in the province.

Big Insurance Business

Appears To Be Still Lots Of Money Available In Canada

More than two hundred and fifty millions of new, paid-for, ordinary life insurance was issued in Canada in the first seven months of this year by 15 companies having in force 85 per cent. of the business. These figures, as reported by the Life Insurance Sales Research Bureau, constitute striking evidence of public confidence in the life insurance companies operating in the Dominion.

In the 12 months of 1931, payments of the life companies to policyholders in Canada and to beneficiaries under Canadian policies, as death claims, matured endowments, dividends, surrender values, etc., amounted to the sum of $102,341,592. In addition, loans on policies were increased during the year by $46,551,638.

A Costly Lawsuit

Customer Of Paris Underground Railway Had No Case

A lawsuit which lasted six years has just been concluded in Paris. The amount at issue was five centimes. Apparently, after a book of tickets for the Metro, the Paris underground railway, had been bought, fares were raised, and a supplementary charge of five centimes was demanded when one of the tickets was presented. The result was that this action was brought against the Metro. It has failed, after the plaintiff has spent sufficient in costs to have taken him round the world.

Sky Is Always Beautiful

Like All Common Things People Study It Too Little

The fact that the shines every day with nothing to obscure it but clouds is much more wonderful than the eclipse. And the clouds, with their changing shape and color, are full of beauty, especially at sunrise and sunset. The fault is in ourselves, that we study the sky too little, and do not fully appreciate its beauty because it is so common and so easy to see, without smoked glasses.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Village For Sale

On a board attached to a tree just outside the village of Aubepine, France, is a sign roughly painted, which reads "Village For Sale." The price asked is about $30,000. The village has been completely abandoned, despite the movement, evident in many French districts, of a slow return to the country.

Great Bear Lake Mineral Field Destined to Place Canada in Front As Largest Radium Producer

"Almost too good to be true," is the way J. C. McNabb, engineer of construction Canadian Pacific Railways, describes prospects in the Great Bear Lake mineral fields, following an inspection tour.

Mr. McNabb firmly believes in the enormous potential wealth of the district, he declared, and it will some day place Canada in the forefront of the world as a radium producer. Silver, copper, and other valuable minerals abound there, too.

The new reduction plant, established by the Dominion Department of Mines in Ottawa, has completed several extractions of radium from the Great Bear pitchblende with "almost fantastic results," he continued. From 97 to 98 per cent. of the radium has been extracted from the ore in each test.

"The plant was placed in Ottawa rather at Great Bear Lake because three tons of acid to one ton of ore are used in the reduction process," he said. "Thus it is cheaper to ship out ore than to ship the acid to Great Bear owing to prevailing transportation difficulties and high freight rates inevitable when supplies must be carried by airplane or portaged for many miles overland.

"I believe the Ottawa plant will become one of the leading units of its kind in the world. It is the only one of its kind in the British Empire at present and obviates the necessity of shipping the ore to Belgium or Czecho-Slovakia for reduction."

Mr. McNabb pointed out that the life of the radium salts secured from the Great Bear Lake pitchblende was estimated at 250 years while the Belgian product was effective for only 20 years. It was to be hoped, he concluded, that in the near future Canada would be able to break away from the Belgium combine with beneficial results for all mankind.

Problem Solved By Cook

High Electric Bill For Refrigerator Puzzled Service Man

Our record of the little battles between humans and their machines has been lengthened by a little story about a refrigerator, sent us by a man who read a story we had about an electric clock. The people who had sold the refrigerator received a call from its owner, asking them to hurry right around and make some sort of adjustment, any kind of adjustment. The thing was, the owner reported to a service man, eating its head off. It was using enough electric current to run a machine shop. The service man looked at the electric bills, before and after, and agreed that, indeed, something was radically wrong. He inspected the icebox carefully. Everything was fine. He went over the wiring. Nothing wrong: He went over a lot of things with no result. Then he sat down and looked at the machine reproachfully. While he was so engaged, the colored cook came in and he idly asked her how she liked her new refrigerator.

"I likes it fine," she assured him, "jes fine. I leaves the door open and she cools the whole kitchen noble."—The New Yorker.

Canadian Troops Made Good Trade Emissaries

French People Acquired Taste For Their Cheese and Jam

Canadian soldiers who served in France acted as trade emissaries for Canadian products, according to Col. H. Barre, Dominion Trade Commissioner in France.

During the Great War, he said, in a recent interview, Canadian troops shared their cheese and jam rations with French people and the latter developed a liking for these foods. As a result there is a demand for Canadian cheese and jam in France, particularly in the northern part.

B.C. Gold

Gold production in British Columbia increased by 25 per cent. in the first half of this year. Placer mining is active with 5,000 men in search of gold. Production of all minerals in British Columbia in the first six months of 1932 was valued at $14,336,060.

Jersey cattle of an exceptionally high type are being developed in British Columbia.

"Darling, do you think your mother will accept me as a son-in-law?"

"I am sure she will. We always disagree about everything."—En Rolig Talf Timma, Gothenburg.

New Buildings For University Of London

Over Forty Years Since First Ones Were Erected

London's famous "Bloomsbury"—the Bloomsbury of lodging house and shabby streets—is doomed. Over a large part of it will rise a $15,000,000 building project, destined when finished to house the University of London. Architects, under the leadership of Charles Holden, are engaged in designing the vast project, and the foundation stone is to be laid in the new year.

It will be many years before the whole of the new university buildings are ready, but it is hoped to have a portion of them finished for the celebrations in 1936. Yet for even this portion 10,000 expert drawings and blue prints are involved.

London university is the largest in Europe, but many Londoners are all but unaware of its existence. The present buildings of the university proper were erected some 40 years ago.

High Price Of Golf

Being Poor Player Cost Briand Premiership Of France

In a certain golf clubhouse some of the members were commiserating with a young colleague who had been dismissed by his firm, owing to his frequent absence at golf. "Still," said one of the old members consolingly, "don't forget that old Briand was once sacked by his country from the Premiership for the same vice." That historic match with Mr. Lloyd George took place at Cannes in 1922. M. Briand, who knew little about the game, did not play well and each fozzle was reported with gusto by the pressemn. France was so annoyed with the "indignity" he had brought upon himself that they howled for his blood—and got it.

A Bright Student

Twenty Year Old Girl Takes Coveted Degree In Germany

Miss Ruth Gruber of New York, has just received a Ph.D. degree from the University of Koeln, in eGrmany.

She not only was graduated with honors, but at 20 years of age, she is now the youngest German doctor of philosophy. Her professors are just as enthusiastic about her achievements as she is about German universities.

Miss Gruber took courses in art and German. She came to Germany as an exchange student, not intending to take a degree, but her professors convinced her she could do so easily.

FATHER: "So you want to marry my daughter? Have you considered her family in this matter?"

SUITOR: "I have, sir. I love the girl so much, I'd be willing to put up with anything."—The Humorist, London, England.

Fewer Giants and Dwarfs

Advance Of Medical Science Said To Be Reason

The death of Vlado Velokovitch, the world's smallest man, at Ljubljana, near Belgrade, brings to light the fact that both giants and dwarfs are becoming scarce. The advance of medical science is responsible for this change, and although the average general height has decreased slightly there are fewer extremes at either end of the scale. Vlado earned his title with a mere 23 inches, but his widow is only four inches taller. While dwarfs are comparatively rare, there is much more competition for aspiring giants.

While doctors can offer no limits for dwarfs, giants do not often exceed seven feet. A surprising number have surpassed this imposing height, though, the most notable giant of recent years being Machnow, a Russian mammoth man. Machnow attained the enormous stature of nine feet eight inches, or over five times that of Vlado, Machnow's appetite was in proportion to his bulk, for he required two quarts of milk, a dozen eggs and a couple of loaves of bread for breakfast. His dinner consisted of a mere three pounds of meat, five pounds of potatoes and half a gallon of beer, while at nine o'clock he fortified himself with a light supper of 19 eggs, three pounds of bread and butter and a quart of tea. For his evening smoke he could then stroll out and light his cigarette at a gaslamp.

John Middleton, a Lancashire giant of the seventeenth century, is reputed to have attained nine feet eight inches also.—The World-Wide News Service.

Aeroplanes Develop Canada

Bringing Hitherto Almost Inaccessible Places Into Contact With Civilization

The modern aeroplane is playing a large part in the development of the hinterland of Canada not yet accessible by railway or automobile. While aeroplane development in some countries has leaned to the spectacular, in Canada it has been mainly along such practical lines as survey work, forest protection, and the establishment of communication with remote areas.

The recent interest in the Great Bear Lake district in the Northwest Territories has given a further impetus to the use of the aeroplane for prospecting and transportation. A few hours of flying eliminates the necessity of cross-sectioning an area that would probably take a whole season of prospectors' work if it had to be explored on the ground. The rapid movement of passengers and freight to areas otherwise inaccessible is an important factor in speeding up the development of Northern Canada.

Pelicans have no song and the adults no call notes.

Pocket Radio Perfected

British Policemen Now Equipped With Instrument That Enables Him To Receive Spoken Messages

Exhaustive tests which proved that police pocket wireless can be regarded as an accomplished fact, have been carried out at Brighton in the presence of British Home Office officials.

The set being used weighs only 1 lb. 12 ozs., is 6 in. long, 4 in. wide and 1 in. deep, and fits easily into the breast pocket of a policeman's tunic.

A tiny bell fitted to the instrument rings when a message is about to come through and on applying an ear-phone the wearer can receive spoken messages as clearly as by telephone within a range of 50 miles.

It is proposed to equip the Brighton police with the set, and it is likely that other forces will follow suit.

The inventor is Mr. C. I. P. Dean, a young wireless engineer, of Slough, Buckinghamshire.

Centenary Of the Lawnmower

Machine First Used For Trimming Nap Off Cloth

It is just a hundred years since the lawnmower was invented. It was not invented in the first instance for shaving lawns. The first machine of the kind was produced by Edwin Budding, a textile engineer, to trim off the nap from newly woven cloth, a task formerly done by hand with the aid of shears. This machine was responsible for an outbreak of riots in clothweaving districts. Budding saw that the cloth mower of his time might well be applied to lawns, and he produced an extraordinary contraption about as big as a modern motor-car which did the job fairly well. His later machines were smaller.

Airplane Delivers Paper

Lonely Fire Lookout In California Receives Two Daily

Miles away from railroad or main highway the fire lookout at Frazier Peak, California, receives his daily papeg by airplane.

A small group gathers twice a day to gaze at a speeding airplane as it drops a San Francisco newspaper on the way to Los Angeles and a Los Angeles newspaper on its way north again later in the day.

Jess Hart, the engineer on the flying craft, has received a letter from A. L. Ellis, lookout at the lonely station in the Tehachapi range, thanking him for the service.

Britain's Largest Station

In Great Britain the largest railway station is Waterloo, where, in twenty-four hours, 1,400 trains are dealt with at twenty-three platforms. The busiest junction is Clapham Junction, through which upwards of 2,000 trans pass every twenty-four hours.

The Farmer Controls Cost

Low Prices Obtained Can Be Offset To Some Extent By Cutting Production Costs

"The cost of producing crops is at all times a very important consideration," observes E. S. Hopkins, B.S.A., M.S., Phd., Dominion Field Husbandman. "Return values are more or less controlled by the law of supply and demand or by other prevailing conditions, and the producer has very little influence upon the price he will receive for his product. He has, however, some control over his cost of production and the economy with which he produces his crop may mean the difference between profit and loss on that crop. In times of depression and low prices this is doubly important. If profits are to be maintained when prices are low costs must be measured accordingly."

Embargo Affects Prairies

Measures Taken To Control Crown Rust Of Oats and Black-Stem Rust Of Wheat

With a view to assisting in the control of crown rust of oats and black-stem rust of wheat, a ministerial order, effective after September 1st, 1932, prohibits the importation of the European buckthorn and certain species of barberries into the three prairie provinces—Manitoba, Saskatchewan and Alberta—from any of the other provinces of the Dominion. The order further provides that if the European buckthorn and nine named species of barberries are found within the three prairie provinces they shall be exterminated without any claim for compensation.

Says Days Are Longer

Mystery Of Lengthening Is Explained By Scientist

Daylight saving legislation will be unnecessary in a few billion years. For days, of their own accord, are getting longer and longer.

The mystery of the lengthening day was explained to the Canadian Club at Toronto by Sir Frank Dyson, astronomer royal and director of the Greenwich Observatory.

"The moon is pulling at the tides and the earth is turning under this sort of friction. It would work out to the extraordinary minute measurement of one one-hundredth of a second a day every century," said Sir Frank.

Salt For Range Cattle

Amount Of Salt Used By Cattle Depends Upon Weather Conditions

The amount of salt used by cattle on range is closely co-related to weather conditions, according to special studies in this respect which have been made at the Dominion range land experimental station at Manyberries, Alta. During a wet spell, or even when there is snow on the ground, cattle eat more salt. From April to November an average of .51 pounds of salt per month per head was noted. The greatest loss of salt by weathering was during June and July, while during the first part of the spring and in the fall when precipitation was light the loss was negligible.

A physicist finds that a room full of men can hear a speaker better than the same room full of women, because heavy clothing that men wear absorbs sound waves.

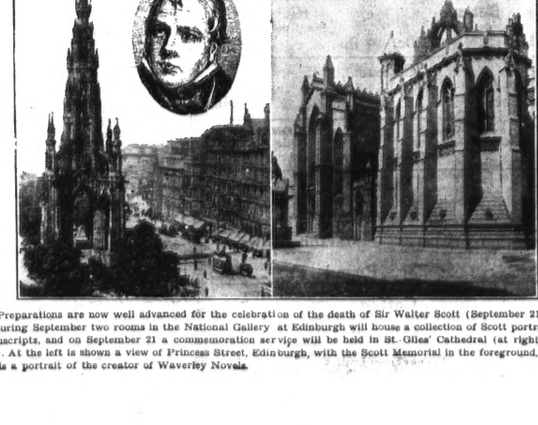

Machinery can now be fastened to floors without bolts or screws by a method in which an oil-waste and compression-proof compound is used.

Over 250,000 evergreens are expected to be shipped next December from British Columbia to the United States for the Christmas tree trade.

Canadian products are prominently displayed in the Empire Shop of the Empire Marketing Board, at Sheffield, England.

Indians often made pets of beaver.

SCOTLAND TO HONOR GREAT NOVELISTS MEMORY

Preparations are now well advanced for the celebration of the death of Sir Walter Scott (September 21, 1932). All during September two rooms in the National Gallery at Edinburgh will house a collection of Scott portraits and manuscripts, and on September 21 a commemoration service will be held in St. Giles' Cathedral (at right of picture). At the left is shown a view of Princess Street, Edinburgh, with the Scott Memorial in the foreground, and inset is a portrait of the creator of Waverley Novels.

Interesting Research Work Planned For Investigations In Regard To Durum Wheat

Grading Experimental Fleeces

Fleeces From Western Canada To Be Graded In the East

Efforts of the several organizations which have co-ordinated their plans for the devolpment of improved Canadian sheep and wool through the National Research Council's Associate Committee on Wool Research have so far advanced that fleeces from the western experiments at Cardston, Edmonton, Lethbridge and Saskatoon are to be graded in detail at Weston, Ontario this month.

A decision will be made at that time whether or not the fleeces will be followed through to the manufacturing stage.

At the same time fleeces from six different breeds of sheep secured in England may be compared with fleeces from similar breeds grown in Canada to detect and estimate environmental influences. A similar comparison between Canadian and New Zealand fleeces is to be made at a later date.

Cross breeding has been done on a large scale in the attempt to develop a type of sheep better suited to Canadian conditions and producing a higher quality fleece. In addition a special study of environmental influences such as nutrition, temperature, etc., has been in progress at Edmonton. A progress report on the latter is to be presented at next week's meeting.

The grading is to be done in the warehouse of the Canadian Co-Operative Wool Growers.

Think These Over

Difficult Questions Given Freshmen At End Of First Year

Here are some of the questions University of Chicago freshmen had to answer at the close of their first year of study under the direction of Robert Maynard Hutchins, the youngest university president in the country.

Do woodpeckers have sharp bills adjusted for pecking wood?

Do moths collect about a light at night only because of the presence of other moths?

Do potatoes stored in the dark lose weight faster after sprouts have grown out than before?

Has the tapeworm a specialized alimentary tract?

Does the spider weave its web to imitate its elders, or because of trial and error learning, instruction or instinct?

Is it true that polar bears are not found in the Antarctic because the environment is not suitable for their existence?

One of the most interesting questions asked the students to trace a "critical episode" in the life of a red blood cell that went adventuring with one of its fellows in a human body.

May Make War Impossible

Nothing Can Stand Up Against Destructive Possibilities Of Airplane

Lord Trenchard, long at the head of British flying, has publicly stated that he regards it as a great pity that flying had ever been invented. Lord Cecil has agreed in this opinion, but added that the aeroplane could never be abolished. The evil of it is that it is so readily convertible to war purposes and nothing can stand up against it owing to the violence and virulence of the cargo it may carry. Few perhaps remember that on the morning when the Frenchman landed in his monoplane on the soil of England the few who saw him land had been watching a submarine rise, travel and sink again. Those two marvels in one morning were fraught with great significance. The aeroplane with its destructive possibilities will make wars impossible. The cavalry, the infantry, the armies, the navies are all obsolete. It looks as if the pastime of war would have to be given up.

Tell the Instructor

The sergeant-instructor was taking a class of backward recruits in musketry drill.

"Private Smithers," he said, with some wrath, "I just told you to take a fine sight and you at once did the opposite."

"Did I sergeant," murmured Smithers nervously.

"Yes, you did," snapped the sergeant. "You ought to know by now what a fine sight is. What is a fine sight, anyway?"

The recruit looked thoughtful.

"A very large ship full of sergeant-instructors sinking in the middle of the Atlantic," he returned.

Lodger: "Bring some soup, please."

Landlady: "What kind, sir? Windmill soup?"

Lodger: "Windmill soup?"

Landlady: "Yes. If it goes round, you get some."

The youngest licensed radio amateur in the United States is Alan T. Margo, of Portesville, California, aged nine and a half years.

Camberwell, England, has banned radios from public places.

The Associate Committee on Grain Research, since its organization in 1927, has carried out an extensive programme of investigation of various factors affecting the quality of Western Canadian Hard Red Spring Wheat. Since quality is a purely relative term denoting the suitability of a given material for the particular purpose which it is intended to serve, such studies on the common or bread wheats involve a determination of their flour yielding capacity and their suitability for making yeast leavened bread possessing certain desired characteristics. For this reason the cereal research laboratories collaborating in the work of the Associate Committee on Grain Research are equipped with experimental flour mills and test baking equipment.

Durum wheat, however, is valued largely because of certain specific characteristics which make it particularly suitable for the manufacture of alimentary pastes such as macaroni, spaghetti and vermicelli. In the manufacture of these products, semolina, a refined granular product of the wheat is chiefly used, requiring special rolls which shear the wheat rather than crush it into flour. In order to remove bran and germ particles, a current of air is drawn through the material in a special apparatus known as a purifier. The experimental milling equipment for durum testing is constructed along similar lines to the large scale commercial machinery. An experimental mill and small purifier, specially designed for durum work is now being purchased as part of the equipment comprising a complete durum testing laboratory being installed in the Department of Agricultural Chemistry, University of Manitoba. This phase of the Committee's activities will be under the direction of Dr. W. F. Geddes. To determine the quality of semolina an experimental macaroni unit comprising a mixer, kneader, macaroni press and dryer is an essential part of the equipment and is being built by a prominent manufacturer of large scale macaroni machinery to rigid specifications.

In contrast to the flour milled from bread wheats, an intense yellow pigmentation is desired in semolina. This coloration is due to the pigment carotin and for its accurate determination a spectrophotometer is essential. The addition of this apparatus to the laboratory equipment of the Committee will not only enable accurate quality studies on durum wheat to be carried out, but will be of inestimable value in determining the carotin content of flours milled from different varieties of bread wheats. It will also be useful in a study of the relative ease of removal of the yellow colour from the different flours by means of bleaching agents.

The laboratory about to be installed will be the only one in Canada and will permit the Committee to carry out projects on drum wheat, such as have already been completed on the common wheats. The durum projects will include studies of varieties and the influence of environment on macaroni making quality.

Brief Cogunomens

World's Shortest Place Name Is In Sweden

The French claim the distinction of having the shortest surname in the world, writes a correspondent. That is "O," and it is fairly common in Paris. A good second is the Irish "Ek," which, curiously enough, is also found in Sweden.

Coming to the world's shortest place names, "A" in Sweden leads the way. Then "O" turns up once more as the name of a town in the Chinese province of Honan. But Holland has the last word (or letter) with "Y," which is the name of a bay in the Zuyder Zee.

It is not necessary to go abroad for examples of short names, writes another correspondent.

In Inverness-shire there is the River E, rising in the Mouadhliath Mountains and forming a tributary of the River Gaurag, itself a tributary of the River Foyers' which flows into Loch Ness.

Blagray, a farm house 300 years old, in Glasgow, Scotland, is to be torn down to make room for modern buildings.

Among our special ambitions is to be the weak link in a chain letter.

"Walter, throw that drunken man out."

"He has already gone, sir."

"Bring him in again, and throw him out."—Vart Hem, Stockholm.

Bentley News

The recent rains delayed threshing considerably, but now that the fine weather is with us again, we can hear the hum of threshing machines all around the community.

Mrs. McLennan had an "At Home" tea on Friday afternoon. Everybody reports a wonderful time.

Mr. and Mrs. Jack Damron were in Edmonton last week.

Mrs. Boyd Muir spent last week with Mr. and Mrs. Beacom.

A large number of people are daily visiting the new hospital, which is nearing completion. The wiring, plastering, etc., finished this week.

Two families from the cities are still camping at Brownlow's landing, and are staying as long as the weather is fine.

Mr. H. Hopkins, Dr. Henry, Mr. Blish, returned from a trip to the mountains last week.

Threshing will be general in Bentley this week, if the fine weather continues.

Miss Addie McNeil of the Wetaskiwin Hospital staff was a visitor in Bentley last week, accompanied by Miss Gwen Halpin, R.N.

At the Avalon

"SKY BRIDE"

"Sky Bride," a romantic adventura story now becomes a thrilling motion picture aviation melodrama, Paramount has taken John Blythe's original aviation story and transformed it into a gripping portrayal of how a "bird man" regains his lost courage and wins the love of the girl he adores. This picture depicts the hair-raising stunts of barnstorming aviators flirting with death, as they put over their stuff in an air circus, a popular Fourth of July and Country Fair feature of a few years ago.

According to Captain E. H. Robinson, aviation technical expert, stunt flying, like that shown in "Sky Bride", requires the highest degree of courage and flying ability.

Richard Arlen, Virginia Bruce, Jack Oakie, Charles Starrett and Robert Coogan feature in this picture which shows at the Avalon this week.

COMING—

Geo. O'Brien in "The Gay Caballero," also a real slim Sommerville, comedy, Sept. 22, 23, 24.

"Double Feature "Arizona Terror and Heartbreak," Sept. 29, 30 and Oct. 1

ST. ANDREW'S CHURCH

Rev. R. B. Layton, Pastor

Sunday, Sept. 18th.

Morning Service, Sunday School at 11:00 a.m.

Anthem "Keep Moving," (Lorens.)

Evening Service, 7:30 p.m.

Anthem "Send out Thy Light," (Gounod).

Solo by Mr. Davidson of First Baptist Church, Calgary.

Mission Band meeting immediately after Sunday School. Members please bring their subscriptions to World Friends.

Prof. Jackson of St. Stephen's College will occupy the pulpit on Sept. 18th, in the absence of Rev. Layton, who is attending a General Council Committee meeting in the East.

Usual Rally Day services will be held the last Sunday of the month, and the rite of Baptism observed.

The regular meeting of the W.M.S. will be held at the home of Mrs. J. N. B. MacDonald on Tuesday, Sept. 20th, at 3:00 p.m.

Mr. L. D. Wright, the new Musical Director of St. Andrew's Church, is a musician of 24 years experience. Coming to Lethbridge in 1919, Mr. Wright spent 10 years in Southern Alberta, carrying on his work as Band Master, Teacher and Choral Conductor. During that time his choirs and chorus have been successful in winning first place at Local, District and Provincial Festivals for the past four years.

Mr. Wright was born in Belfast, Ireland. His sister played in Dublin Castle at the age of 9 years, and is still in the profession. His father, Mr. Henry Wright is English, and retired two years after sixty years as Soloist, Teacher and Musical Director, having played before the present King. Miss Betty Gull, of Lethbridge, has been singing for over two years, Harry Wright, his son, passed his first exam. Toronto Conservatory with honors in 1927, and has done much public singing and radio work.

DEATH OF ALEXANDER SWANSON

Lacombe lost another of her highly respected citizens this week, in the death of Alexander Swanson, which occurred on Sunday last. Deceased was in his 84th year, and had resided in Lacombe District since 1899. Originally from Scotland, Mr. Swanson had farmed in Ontario and Manitoba for several years prior to coming here. He retired from farming in 1914. The funeral was held on Tuesday from St. Cyprian's Church, Rev. T. H. Chapman conducting the service. He leaves to mourn, three daughters, Mrs. R. Bagley, Mrs. Wm. Burris and Mrs. R. Gibson, and two sons, Wm. and A. D., of Lacombe. He is also survived by one sister, Mrs. Sinclair, in Scotland.

He leaves a large number of friends in the community, who extend their sincere sympathy to the bereaved family.

DEATH OF J. W. SINCLAIR

John Wesley Sinclair, who for some years has farmed east of town, died on Sunday last after a short illness. The funeral was held on Tuesday, services being conducted in the United Church, Rev. M. Lindsay Wright officiating. Deceased was born in Nova Scotia, but prior to 1920, when he settled here, had lived in Victoria, B.C., and the Kootenay country. He leaves two daughters, Maude and Ada, who reside in New York; three brothers, Bruce of N.S.; George, of California, and Howard, of Vancouver. Three sisters also survive him, Misses F. N. and N. K., of Vancouver, and Mrs. Sweasey, of Salem, Mass. Deceased was in his sixty-sixth year.

The I.O.O.F. had charge of the Funeral, Mr. Sinclair being a member.

Nova Scotia, Montreal, Vancouver, and Edmonton papers please copy.

C. R. Hembury, Lacombe, Alta.

Blackfalds News

"Visitors Day" at the mouth of the Blindman River on Monday last was very successful and those present enjoyed themselves to the full. Rev. A. R. Schrag, Mrs. Schrag and son and Miss Brown, of the Hospital staff, all of Wetaskiwin, Rev. Cantelon of Hobbema, Rev. and Mrs. MacLennan, of Bentley, Mrs. Layton and Robert and Miss Young of the Lacombe school staff and two Lacombe boys; Mr. Fay, Mrs. Stevenson, Rev. and Mrs. H. D. Riggs, of Blackfalds were all welcomed at the junction of the rivers by Mr. David Bowen of the Provincial Auditor's staff. After a short inspection of the fossils Mr. Bowman had on display, the company crossed the Blindman and spent an hour digging in the banks for the leaf impressions of a period of forest growth a million years ago. Each one was able to find something of interest. About 6 p.m. all sat down to a splendid picnic supper of sandwiches, ice cream and cake. The camp fire was lighted and spread its warmth and glow in the cooling evening. While all stood about the fire, Mr. Schrag moved a hearty vote of thanks to Mr. Bowman and Mr. Riggs for their part in making possible such an enjoyable afternoon. Mr. Cantelon seconded the motions with suitable words to which the host replied. Some expressed their intention of returning again at an early date to this interesting point on the rivers.

Mr. Bowman returns home on Thursday after a brief holiday.

Spruceville News

A banquet was held in the hall on Wednesday, Sept. 7th in honor of Mr. and Mrs. H. Stout, who completed 50 years of happy wedded life on that date. The hall was beautifully decorated for this occasion with ferns hanging in profusion above the tables and laid along the platform with marigolds interspersed with the green in artistic arrangement. The tables looked nice with vases of golden hued flowers placed along the centre, while the beautifully decorated wedding cake held the place of honor in front of the bride and groom.

Mr. Marshall presided as toastmaster, fulfilling his duties excellently. The toasts to the bride and groom were given by Mr. Proudfoot and Mrs. Barnes respectively and to the family by O. S. Young, and also responded to. The supper was followed by a short musical programme and recitations, after which the guests of honor were presented with a chair, as a small token of the respect in which they are held in the district. All joined in wishing them many more years together spent in our midst.

We deeply regret to announce the death of Mr. Swanson, an old resident of the district, much liked and respected by all who knew him. The funeral service was held on Tuesday from the English Church. We extend our sympathy to the bereaved family.

The afternoon meeting of the U.F.W.A. will be held at the home of Mrs. R. Boden, on Wednesday, Sept. 21st. The roll call to be answered with a humorous joke, followed by a short programme.

An afternoon tea and Musicale will be held at the home of Mrs. H. M. Jones, Edmontoh Trail, on Tuesday, Sept. 20th, from 3 p.m. to 6 p.m. given by the W.A. of St. Cyprian's Church. Many interesting items. Also Sale of home baking. Come and win a prize!! The article for the afternoon will include: Miss K. Walters, Miss Warwick, Mr. C. Sansbury and others.

MARRIED

Newman—Grimes

On Sunday, Sept. 4th at 9:45 a.m., St. Cyprian's Church was the scene of a very beautiful but quiet Marriage, when Ethel Valeria, daughter of Mr. and Mrs. E. O. Grimes of Lacombe became the bride of Thomas Edward, only son of Mr. T. H. Newman, also of Lacombe.

The marriage was solemnized by the Rev. T. H. Chapman, Rector of St. Cyprian's, in the presence of the bride's parents, the father of the groom and Mr. Colin A. Pringle.

The mother of the bride, and Mr. Colin A. Pringle signed the Parish Register as witnesses.

The young couple, who are highly steemed in the town and surrounding district, are the recipients of the very best wishes from a host of friends. They will make their home in in Lacombe where the groom is in partnership with his father in the firm of "Newman & Son", Contractors, Builders, etc.

Miss Annie Halpin left for Calgary this week, where she will continue her studies in Commercial High School in that city.

BAPTIZED

Ann Elizabeth Debney

The Sacrament of Holy Baptism was administered to Ann Elizabeth, on Wednesday, September 7th, at 3 p.m., only daughter of Philip Lawrence and Isabel Elizabeth Debney of Edmonton; the officiating Clergyman being the Rev. T. H. Chapman, Rector of St. Cyprian's Church.

The Godparents, or Sponsors were Ethel MacDonald, Miss Alice S. M. Inskip, (proxy for Dorothy Frances Laurence Debney) and Mr. Alfred T. Inskip, (proxy for Count Paul A. Von Auelberg).

The beautifully impressive service was brought to a conclusion by the singing of one of the Baptismal Hymns, with Miss A. S. M. Inskip presiding at the organ, and by the Benediction, which was pronounced by the Rector.

The Ladies' Guild of St. Andrew's United Church will hold a chicken dinner in the Church Hall on Wednesday evening, Oct. 19. Please keep this date in mind.

Clive News

Born: to Mr. and Mrs. O. Westling, of Clive, a daughter. Born Sept. 7, at Red Deer Hospital.

The first load of grain this Fall was handled by the Searle Elevator. The grain was hauled by V. Duffy, and was harvested with a combine.

The A.P. and Searle grain elevators have just been wired for lights.

The Government Tree Planting car was a big attraction last Wednesday. The lectures, etc., being very well attended.

Dance Friday night in the Community Hall. Everybody come.

Threshing is well under way in the district.

The Lacombe Presbytery meeting will be held in Clive on Wednesday the 21st. The following towns will be represented: Lacombe, Wetaskiwin, Millet, Blackfalds, Hobbema, Bentley. An intersting programme has been arranged, including addresses by well known speakers, Reports of the various committees, Election of Officers, Reports of Foreign Missions, Musical numbers, etc. The Ladies of Clive will serve dinner and supper at the nominal price of 35c. a plate.

GOLF NOTES

The tea held last Friday was a very successful one. The day was perfect for golf, and quite a number of ladies were playing.

The hostesses for the Tea to be held on Friday, Sept. 16th are Mrs. Taylor, Mrs. Robt. McKenzie and Mrs. Teare. All members are urged to be present. There will be a few more teas before the close of the season, and we hope that as many ladies as possible will take the opportunity to enjoy the lovely fall days at the Club House.

TEACHER'S CONVENTION

The teacher of the Red Deer Inspectorate are holding their convention this year in the Assembly Hall of the Lacombe School on Thursday and Friday October 6th and 7th.

The program includes a demonstration of a rural school by Mrs. Banks and pupils of Mountain Grove School; a visit to the Dominion Experimental Station to study the different types of livestock; two addresses by Miss D. Dickie, of the Calgary Normal and an address by Alfred Speakman, M.P., on "The Lighter Side of Parliamentary Life;" School Hygiene by the Red Deer Health clinic; the value of the blackboard by Miss Geneva Clayton; observations and suggestions by Inspector Gibson; an address by the A.T.A. representative and a general discussion.

A full program will appear in a later issue of this paper.

10:00 a.m. Sunday School.
11:00 a.m. Holy Communion. The Sacrament of Holy Baptism will also be administered at this hour.
7:30 p.m. Evening Prayer.

Sunday, Sept. 25th. Annual Harvest Thanksgiving Service both morning and evening. Special Services, Special Messages, Special Music; and please do not forget the Special Thanksgiving Offering which will be used to augment the general funds of the Church. It is hoped that every member of the Church, together with all others who may wish to attend, will make it a point to be present.

The Lest We Forget Club will hold their regular meeting in the Town Hall, at 8 p.m. on Wednesday, Sept. 21st. A full attendance is expected.

BAPTIST CHURCH

Sunday, Sept. 18, 1932
Sunday School 11 a.m.
Evening Service 7:30 p.m.
Topic: "Paying What We Owe."
Prayer meeting every Thursday evening at 8 o'clock.
Everyone welcome.
Mr. Williams, Acting Pastor

TCO MANP JUDGES IN THE DOMINION

The Canadian Bar Association has wisely decided to postpone representations to Ottawa on the question of judicial stipends. It was felt that the present period of declining federal revenues is not propitious for the introduction of claims for higher remuneration.

The Canadian judiciary is held in high esteem throughout the Dominion because of its impartiality and high sense of duty displayed by occupants of the bench. It is true that judges are not paid salaries commensurate with the great importance of their work. They are expected to maintain a high sense of dignity, in both private and public life, and opportunities for private gain open to other citizens are denied them because of their calling.

Admitting all this, it must also be acknowledged that there are far too many judges in this country for a population of 10 millions. The judiciary has been established on a numerical scale entirely out of proportion to the number it serves. Preliminary to consideration of the question of higher remuneration there should be a survey by the federal government into the possibility of gradually reducing the number of judges. Great Britain offers an example. The number of judges over there is much smaller than is the case in Canada. A few years ago Chief Justice Meredith, of Ontario, created a sensation by declaring that many judges in that province had far too little to do. He urged that the number should be greatly reduced. The same condition prevails in the western provinces.

Once that condition is remedied, the Bar Association will be able to present a much more formidable claim to the federal government for increased judicial remuneration.

WORLD HAPPENINGS BRIEFLY TOLD

Peter Veregin has resigned as president of the Christian Community of Universal Brotherhood.

Wilton Lackaye, 69, for almost 40 years one of the best-known actors on the United Stage, died at his home in New York, of a heart ailment.

Recommendation has been made that Admiral Sir David Murray Anderson, C.B.E., equerry to His Majesty, be appointed Governor-General of Newfoundland.

The Soviet secret police and local authorities in a decree issued by the government were ordered to adopt energetic measures to stamp out private speculation in foodstuffs.

Word has been received of the death, in Karisawa, Japan, on August 19, of Dr. John G. Dunlop, noted Canadian missionary, who for the past 15 years has been in Japan.

Royal cattle have been sold to Communist Russia, it is understood. Two shorthorn bulls, exhibited by King George at the recent Royal agricultural show, were purchased by the Soviet.

Madeline Slade, follower of Mahatma Ghandi, the Indian Nationalist and civic disobedience leader, has been sentenced to one year's imprisonment for defying government ban against her appearance in Bombay.

London jewelers now use smoke screens to save their diamonds from window-smashing thieves. "Smash-and-Grab" raids have grown so alarmingly that insurance companies have raised their burglary rates.

Members of the Irish Republican army have warned managers of Dublin moving picture theatres not to exhibit films showing members of the royal family, or any films which they regard as containing "British propaganda."

For Unemployed Families

Seven Provinces Have Signed Agreement Under Settlement Plan

Seven Canadian provinces have signed agreements under a relief settlement plan by which the Dominion, Province, and municipality concerned each contribute one-third of a sum not exceeding $600 per family to cover the cost of modest establishment on the land and substituteETSHSH SH the land and subsistence for the first two years. The relief settlement plan is for unemployed families resident in the provinces, who are in receipt of direct relief, and are qualified and physically fit to undertake life on the farm.

This relief settlement plan is primarily an unemployment measure—not a colonization scheme. The underlying principle of the plan is to help people to help themselves by enabling families to contribute to their own maintenance and eventually become self-supporting. Public moneys that would otherwise be spent in the form of direct relief to maintain families in comparative idleness will be expended toward assisting qualified families to get a modest start on the land.

Banff National Park

Oldest Of The Dominion National Playgrounds

Banff National Park, in the province of Alberta, is the oldest of the Dominion playgrounds, the original reservation having been set aside in 1885. It comprises an area of 2,585 square miles of territory. Reserved for the enjoyment of all who visit it, it is also a wild life sanctuary, evidence of which is manifest in the large number of mountain sheep, deer and bear to be seen in the areas adjacent to the highways of the park.

Among certain Eskimos bad temper is considered a sign of being possessed by a devil, lying is a crime punished by death, and marriage is compulsory.

This would be a busy country if a few hundred million dollars now in savings accounts were put into circulation for the purchase of Canadian goods.

A fly has a much wider range of vision than a man because of its round, bulging eyes. The eye of a fly has 17,000 facets, through each of which it gets a different view.

Twelve thousand performers took part in a cotton pageant held recently at Manchester, England.

Maine is the only state in the union bordering on but one other state.

Heir: "Is there no hope, doctor?"

"Well, sir, it depends on which way you look at hope."—Allit for Alla, Stockholm.

Man Eating Tree

British Explorers To Investigate Strange Phenomena In Madagascar

A band of British explorers including one woman, will land on the Island of Sisband the Sailor in a few weeks to search for the mysterious Madagascar "sacrifice tree," which devours human beings.

The so-called man-eating tree, which actually is said to take the lives of young girls rather than men is not a product of the imagination, high authorities declare.

Capt. V. De La Motte Hurst, a fellow of the Royal Geographical Society has been convinced that it not only exists, but that each year it devours several of the most beautiful maidens of the island. The superstitious tribes offer the girls to the tree as sacrifices, he said.

"I have been told about the tree by many chiefs of the island and I have no doubt of its existence," Captain Hurst said. "It eats human beings, but since the natives worship it they are reluctant to reveal its location."

The tree, as described to the Captain, is similar to a colossal pineapple. It is about eight feet tall and six feet around the base. It has long tendrils, which reach upward each about as thick as the arm of a man.

The leaves are large and concave, and are lined with "claws." From the tree comes an intoxicating liquid which the natives drink to arouse the hysteria which leads up to the sacrificial ceremony.

"While the natives dance around the tree, a young girl is forced to drink the liquid," Captain Hurst said. "Then she is compelled to get up into the middle of the tree.

"The tree's tendrils and leaves are hyper-sensitive and as soon as the weight of the sacrificial maiden is pressed against them the tendrils entwine her. The leaves raise slowly and completely hide the girl.

"The pressure of the tendrils and leaves is like a vise and it is said the body of the girl is crushed. I am told that the leaves remain in that formation for five or six days and then slowly reopen. Only the bones of the victim are found."

Captain Hurst's expedition will land at Morundava, a small village on the coast of Madagascar. It will pass through the territories of half a dozen tribes, some of which are hostile. The expedition hopes to take a motion picture of the tree.

Settlers Coming From U.S.

One Thousand Men and Women From New England States To Move To Manitoba

Conclusive evidence that the province of Manitoba continues to attract increasing numbers of settlers from the United States is gleamed from the fact that the move to band together one thousand men and women from all parts of New England to move to that Canadian province next April is well under way.

Already more than four hundred have signed their intentions and made their required deposit, and four score of them hail from the state of Vermont.

New Hampshire and Connecticut have supplied nearly one hundred each of this number, while the balance are at present residents of Massachusetts.

No effort has as yet been made to interest residents of Rhode Island, but the campaign will be started in that commonwealth in the fall.

For the most part those who will make the change in residence from the New England states are natives or former residents of Canada or England. There are few Franco-Americans among them.

According to figures and facts presented by those who have charge of the proposed exodus, the quota of one thousand will be filled by the first of February without question and perhaps sooner.

There are many and varied reasons for the whole-hearted interest in the movement, the foremost being the depression in the industrial and farming districts of New England. Former residents and subjects of the Dominion and England have been exceedingly hard hit by the downward trend and are now facing severe problems of the future.

When final arrangements have been completed, the entire movement will be taken in charge by the agriculture department of the Canadian National Railways. It is firmly believed that the number of settlers going to Canada from the United States in 1933 will exceed those of 1928.

New Potato Best

Cooking authorities agree that for salad making new potatoes are far the best. In addition to their sweet delicate flavor which make them so appetizing, new potatoes are firm and not too mealy, and for this reason they can be cut into cubes without danger of breaking down when combined with other ingredients of the salad. Potato salads are easy to prepare, nutritious, economical and a rich source of energy. It is good at any time.—Dominion Fruit Branch.

Teacher—Now, James, you may give me the definition of exercise.

Jimmy—Exercise is work what a fellow likes to do because it isn't work.

Miracles Of the Blind

Few People Appreciate Handicaps Under Which Some People Work

We have just been looking at a picture of Dr. Helen Keller, the blind and deaf American authoress, and Captain Ian Fraser, C.B.E., M.P. The photograph was taken at Saint Dunstan's, in London, England, the famous hospital where so many blind soldiers were taught to do wonderful things.

In the picture Dr. Keller has her fingers against the lips of Captain Fraser. He is talking normally and she is following every word through feeling his lips with the tips of her fingers. As he has taken an active interest in the work of St. Dunstan's for years, Captain Fraser and Dr. Keller would have common topics for conversation.

We don't always appreciate the handicaps under which many men and women work. In spite of her double affliction of blindness and deafness, Helen Keller has been an outstanding success. Born 52 years ago in Alabama, she lost her sense of sight, smell and hearing when only 19 months old by an attack of scarlet fever. As a child she was taught to speak through the Braille system and the deaf and dumb language. Since then she has become a world figure.

Hundreds of others have not attained the renown of Helen Keller, but they have battled successfully against physical handicaps that are conquered only through determination and courage.

Honey Production In Canada

Western Canada Contributing Its Quota, Figures Show

The total production and value of honey produced in Canada for 1931 is reported in a statement just issued by the Dominion Bureau of Statistics as follows:

Provinces	1931 lb.	Price cents	Value $
P. E. Island	10,000	10	1,000
Nova Scotia	97,772	10	9,777
New Brunswick	100,000	10	10,000
Quebec	5,633,400	7	467,389

Fashion

GUIMPE IDEAS REFLECT YOUTHFUL TREND IN CREPE SILKS AND COTTONS

For this model which is adorable a navy blue crepe silk with the guimpe of vivid red silk spotted in blue, there are numberless possibilities.

It can be fashioned from lacy cottons of the soft woolly type, cotton or silk pique, a sports linen in combination with handkerchief linen, thin woollens and many rayon novelties.

It will take the very minimum of making. The two-piece skirt is finely tacked at the top and joined to the two-piece waist. You'll also find the separate blouse very easily put together. It can have short sleeves, if you prefer them.

Style No. 424 is designed for sizes 14, 16, 18, 20 years, 36 and 38 inches bust. Size 16 requires 2⅝ yards of 39-inch material for dress with 1⅞ yards of 39-inch material for blouse.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

RIVERBEND SCHOOL FOR GIRLS

Manitoba Institution Devoted To the Educational and Aesthetic Development Of Young Canadian Womanhood

Prepared to provide instruction from Grades 1 to 12, Riverbend School for Girls, Winnipeg, will reopen for the autumn term on September 13th, according to an announcement made by the Principal, Miss Joan Foster, M.A.

Since 1929, when Riverbend, the former home of the late Sir James Aikins, became, through his bequest, under the aegis of the United Church of Canada, a boarding and day school for girls, it has reached an academic standard approved by the Department of Education, by which it is regularly inspected. Eight acres of beautifully treed property skirting the Assiniboine River have proven an ideal location for an institution devoted to the educational and aesthetic development of young Canadian womanhood.

Two years ago, the original buildings were augmented by a new modern structure of cut stone and brick, containing assembly hall, dining-room, class-rooms and gymnasium, all with ample accomodation for 190 pupils. University matriculation is an objective, but to meet the needs of those who wish to devote themselves more particulary to the study of literature, history, music and art, a course is offered leading to the Riverbend Diploma, given upon completion of Grade III.

Miss Foster, who is a graduate of McGill and Oxford, is assisted by Miss Laura Cull, as head of the junior school, and the more recent acquisitions to the teaching staff include Miss Marian Macdougall, science; Miss Mary Chestnut, Classics; Miss Beatrice Wilson, director of religious education; Miss Barbara May Erith, English; and Miss Gwen M. Bowman, physical education.

Miss Macdougall, a graduate of Dalhousie University, comes to the Winnipeg school as a qualified teacher of the science required for senior high school work, specializing in University and the Ontario College of chemistry. Miss Chestnut, Manitoba Education, has taught successfully in Manitoba high schools. Miss Wilson, in addition to her course at University College, Toronto, has studied at Emmanuel College and the United Church Training School, and has taken the regular normal school training course with subsequent success as a teacher. Miss Erith comes from London University with honors in English. She holds a London teacher's diploma and has had experience in English and American girls' schools.

Thoroughly qualified to teach corrective gymnastic, dancing and swimming, as well as apparatus work, Miss Bowman is a graduate of the Margaret Eaton School of Physical Education, Toronto, and has had previous experience in a girls' school.

Due to the fact that the Winnipeg city schools are this year discontinuing the teaching of Grade XII, increased emphasis has been placed upon this grade at Riverbend. The members of the teaching staff are all fully qualified, and are specialists in the subjects taught.

The school's representative Board of Governors includes James A. Richardson, L.L.D., Isaac Pitblado, K.C., G. N. Aikins, K.C., Rev. J. A. Cormie, D.D., D. C. Coleman, L.L.D., Principal John Mackay, D.D., W. M. Neal, Rev. J. W. Aikens, D.D., Lawrence F. Palk, Mrs. David Watt and Mrs. R. F. McWilliams, Honorary Secretary.

On its Advisory Council are many names familiar in the church and cultural life of Winnipeg, and the following from other points in western Canada, from which many of its pupils are drawn: Mrs. C. E. Armstrong, Moose Jaw; Mrs. Robert Forke, Pipestone; Mrs. C. F. Adams, Calgary; Mrs. A. F. Laird, Yorkton; Mrs. B. C. Wallace, Edmonton; Mrs. J. E. Brownlee, Edmonton, Mrs. W. C. Murray, Saskatoon; Mrs. T. A. Nelin, Brandon; Miss Alice Fife, Kenora; Mrs. Douglass J. Thom, Regina; Mrs. A. W. Scott, Calgary.

Helped To Make History

Man Who Surrendered Jerusalem To British Died Recently

The "man who surrendered Jerusalem to the British" recently died in the Government hospital at Hebron at the age of 65. He was Ahmed Sharad, and was an inspector in the Turkish gendarmerie in Jerusalem when it was captured by the British in 1917. In company with the late Mayor of Jerusalem, the inspector walked to the outskirts of the city carrying a white flag on a long bamboo pole and delivered it to the British vanguard.

Demand For Flaxseed

The Canadian Department of Agriculture reports a good demand in Ireland for Canadian pedigreed flaxseed for sowing purposes. The demand of the Irish linen industry for Canadian fibre flaxseed is attributed to the quality, germination and purity of the seed assured by the system of government inspection which is in effect.

Why Steal It

"Where's old Bill been lately? I haven't seen him for months."

"What? Haven't you 'eard? He's got three years for stealin' a car."

"What did he want to steal a car for? Why, didn't he buy one an' not pay for it, like a gentleman!"

The most difficult thing to get on the radio is $25 from the second-hand dealer.

New Equipment For Houses

Air-Cooling System Will Be Part Of Modern Necessities

The day is coming when "a modern house" will mean not only one equipped with a bathroom and a furnace, but with an air-cooling system. The device is still too high priced, and more or less in the experimental stage; but it will become perfected and less expensive in a few years, and we shall then be able to live and sleep in quiet, air-cooled and air-washed rooms, with the house windows and doors shut to keep out the hot air, and incidentally, the disturbing noises of the streets.

Recognition Deserved

A "Long Service" prize was presented to an old woman of Bologna, Italy, named Francesca Felicetti, for having been employed by one family for seventy-seven years. She had entered their service at the age of twelve. Twenty-nine other servants have also been presented with prizes for over forty years' service with one family.

The greatest obstacle man has to overcome in the building of civilization is man.

Coomb was an old British corn measure, containing four bushels.

Move Store Of Gold

Sufficient Of Precious Metal To Pave a City Street

The United States Government began the task of moving enough gold to pave the main street of a United States city.

Sixty-eight truck loads containing gold valued at $200,000,000 were carted from the old assay office on Wall Street, New York, to the new one at South Street, and Old Slip. The work will continue until the entire stock, estimated at $2,000,000,000 is moved.

The gold is moved in armored trucks. Machine guns are mounted inside to forestall any bandits ambitious enough to attempt a grand haul. Five guards ride with each truck.

Turn Penny For Luck

Steeplejacks Are Superstitious About Money On Monument At Buffalo

The penny on the highest point of the soldiers' and sailors' monument at Buffalo, N.Y., has been turned over and Francis Neppile expects good luck for next 12 years. Neppile was cleaning the monument in preparation for the city's centennial celebration when he performed the ceremony of turning the penny. He explained that the first steeplejack to climb a monument puts a penny on the top. Each steeplejack who climbs the monument thereafter is expected to turn the penny. If he neglects this task, or removes the penny, he may be pursued by bad luck for 12 years.

World's Wheat Production

Much Lower Yield Is Predicted In Estimates

Total world wheat production of three million bushels below the 1931 total and 36 million bushels below the 1930 total, is forecast in an estimate issued by the Alberta Wheat Pool.

Canada's 1932 wheat crop production is estimated at 475,000,000 bushels; United States, 722,687,000, and total North American continent production at 1,206,757,000.

Recipes For This Week

(By Betty Barclay)

ORANGE BAKING POWDER BISCUITS

(Makes about 18 biscuits)

2 tablespoons shortening.
2 cups flour.
4 teaspoons baking powder.
¾ teaspoon salt.
Grated orange rind.
¾ cup milk or water.
Loaf sugar.
2 oranges, juice of
Powdered sugar.

Work shortening into sifted dry ingredients. Add 1 tablespoon grated orange rind and milk or water. Roll and cut out. Moisten half as many cubes of loaf sugar as there are biscuits with orange juice. Put between biscuits. Spread tops with powdered sugar moistened with orange juice, sprinkle with orange rind. Bake in hot oven (450 degrees Fahrenheit) 15 minutes.

BAKED DELIGHT

2 cups rice flakes, crushed.
¼ cup butter, melted.
2 apples.
2 bananas.
½ cup sugar.
½ teaspoon cinnamon.
¼ cup water.
2 tablespoons lemon juice.

Pour melted butter over rice flake crumbs and mix thoroughly. Place a layer of one-third the prepared crumbs in bottom of buttered baking dish. Cover with 1 apple and 1 banana, pared, and thinly sliced. Sprinkle with half the sugar, cinnamon, and lemon juice. Cover with another layer of crumbs and repeat, using remaining fruit and seasonings. Pour water over mixture. Bake in moderately hot oven (375 degrees Fahrenheit) 30 minutes. Serves 6.

Farmers Advised To Store Their Product

Agriculturists Might Benefit From Theory Of Iowa Man

When historians write a dozen years from now in a chapter probably called "the revolt of agriculture" there will be found the name of Milo Reno.

Some may call him "Militant Milo," and they wouldn't be far wrong, for he has been fighting the cause of the farmer for a dozen years.

Today he is the moving spirit in what may or may not be one of the outstanding economic reforms of the century—based on the theory the farmer should control the distribution of his product to gain a fair price for his goods plus a reasonable profit for his labor.

Like Joseph of Biblical days he advocates storing the fruits of the "seven plentiful years" against the seven years of famine—and then getting a fair price for his product.

Egg Powder Plant

An egg powder plant which will consume 180,000 eggs a day has been opened at Saskatoon, Saskatchewan. During recent years China has had practically a monopoly of the egg powder business, a share of which will now be sought by the Saskatchewan industry.

Mission Ships Never Return

Are In Service In South Seas Until Scrapped

Not long ago a gleaming white ship, fresh from the builders' ways, stole up the Thames for a brief visit before setting out on a voyage from which she would never return.

She was the "Southern Cross VI.," built at Cowes at a cost of $125,000 and destined for missionary work in the Melanesian Islands, where she will remain until she is scrapped, as all her predecessors have been scrapped.

For 73 years mission ship after mission ship has cruised through this vast island diocese in the South Pacific Ocean, which extends in a great curve parallel to the northeast coast of Australia for nearly 2,000 miles. The islands are 40 in number.

The natives there are of a primitive type, their religion is mainly ancestor-worship, with magic and witchcraft besides. The white staff of the mission, some 50 in all, are scattered over all Melanesia, doing pastoral work. The "Southern Cross VI." is their "floating church."

The Ways Of Lightning

Scientists Have Discovered Many Facts Regarding Its Vagaries

Just as if we have nothing to worry about, scientists now tell us that lightning can strike upward just as well as downward. They have 185 photographs to prove that lightning bounces. You may be quick enough to sidestep a bolt detected on its way down, but what's the use? You'll be caught on the rebound, though it probably doesn't make any difference to the person struck whether lightning hit an uppercut or delivered a rabbit punch.

In fact the whole thing oughtn't to make any difference to anybody struck or not struck. The great majority of us have survived hundreds of thunderstorms just by taking care that lightning did not fall on us from above. It wouldn't have saved many persons had the newly discovered facts been household lore a century ago. In the same breath the scientists announce that negative lightning is the deadly variety; positive lightning won't do any worse than melt the filing in one's teeth. How to tell whether an approaching bolt is negative or positive is not included in the information.—Newark Evening News.

French Wheat Quota

Harvest Satisfactory and Less Foreign Grain Needed

A hint as to the explanation of the recent action of the French Government in reducing the percentage of foreign wheat permitted in French bread from 15 to 3 is to be found in the latest reports from the French provinces to Paris, which indicate that this year's wheat harvest will be very satisfactory. A conservative estimate is 300,000,000 bushels for France and Algeria, which would be ample to cover the entire domestic needs of the French people, and all that would be required would be a modicum of the best wheat for mixing purposes. This, according to the trade agreement recently effected with Moscow, will be brought from Russia.

This would seem to explain the reluctance of the French Government to enter into any trade agreement with Canada at the present time in regard to wheat. Reports from other wheat-producing countries, however, are by no means so satisfactory. The Russian crop, indeed, is reported as unlikely to meet domestic requirements by many scores of thousands of bushels.—Montreal Star.

Times Have Changed

An old farmer after paying his bill for a new reaper and binder was asked by the cashier how it went.

"Well, ye see, this time last year I sat on the fence with a cigar in my mouth and watched thirty men reaping my field. This year I reaped it myself, and thirty men sat on the fence and watched me."

More Used To Cars

Who ever heard of a horse being afraid of a cow? A Toronto man has such an equine. The horse had been reared in a city stable and until recently had never travelled the country roads. When it finally met a cow, the horse went away from there in a great hurry, and was only calmed down after considerable difficulty.

Seven-tenths of the railway mileage in the Netherland East Indies is in Java.

Guiana consists of about 6,000.

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of "The Splendid Folly," "The Hermit Of Far End."

Hodder & Stoughton, Ltd., London.

CHAPTER XXX.—Continued.

Facing her, as she reached the topmost step was a glass door, giving entrance to Claire's own particular sanctum, which usually, in summer, stood wide open to admit the soft, warm air and the fragrant scents breathed out from a border of old-fashioned flowers, sweet and prim and quaint, which encircled the base of the house.

But today the door was shut and forbidding-looking, and Jean experienced a sudden sense of misgiving. Supposing Claire chanced to be out just when she had arrived brimming over with the hundred little feminine confidences that were to have formed part of the "heart-to-heart" talk! It would be too aggravating!

Her eager glance flew ahead, searching the room's interior, clearly visible through the wide glass panel of the door. Then, with a startled cry, she halted, her hand clapped against her lips to stifle the involuntary exclamation of dismay and terror that had leapt to them.

The afternoon sunshine slanted in upon a picture of grotesque horror—a nightmare conception that could only have sprung from the macabre imagination of a madman.

In the middle of the room Claire sat bound to a high-backed chair, secured by cords which cut cruelly across her slender body. Her face had assumed a curious ashen shade, and her eyes were fixed in a numbed look of fascinated terror upon the tall, angular figure of her husband, which pranced in front of her jerkily, like a marionette, while he threatened her with a revolver, his thin lips smiling cruelly, drawn back from his teeth like those of a snarling animal.

He was addressing her in queer high-pitched tones that had something inhuman about them—the echoing, empty sound of a voice no longer controlled by a reasoning brain.

"And you needn't worry that Mr. Brennan will be overwhelmed with grief at your early demise. He won't—te-he-he-"—he gave a foolish, cackling laugh—"he won't have time to miss you much! I'll attend to that—I'll attend to that! There'll be a second bullet for your dear friend, Mr. Brennan."

. . . . Crack! The sharp report of a revolver shattered the summer silence as Jean sprang forward and wrenched at the handle of the door. But it refused to yield. It had been locked upon the inside!

Then, as the smoke cleared away, she saw that Claire was unhurt. Sir Adrian had deliberately fired above her head and was now rocking his long, lean body to and fro in a paroxysm of horrible, noiseless mirth. Evidently he purposed to amuse himself by inflicting the torture of suspense upon his victim before he actually murdered her, for Latimer had been at one time an expert revolver shot, and, even drug-ridden as he had since become, he could not well have missed the helpless target by accident.

Claire's head had fallen back, but no merciful oblivion of unconsciousness had come to her relief. Her mouth was a little open and the breath came in short, quick gasps between her lips. Her face looked like a mask, set in a blank stupor of horror.

The sound of the shot brought Blaise and Nick racing to Jean's side. One glance through the glass door sufficed them.

"God in heaven! He's gone mad!" Nick's voice was quick with fear for the woman he loved.

"Get Tucker here at once!"

Blaise's swift command, flung at her as he and Nick leapt forward, sent Jean flying along the terrace as fast as feet winged with unutterable terror could carry her. As she ran, she heard the crash of splintering glass as the two men she had left behind smashed in the panel of the locked door, and, almost simultaneously, Sir Adrian's pistol barked again — another shot, and then a third in quick succession.

The sound seemed to wring every nerve in her body. Blaise . . . had that madman shot him?

With sobbing breath she rushed blindly on into the house and met the butler, running too, white faced and horror-stricken.

"My God, miss!—Sir Adrian's murdering her ladyship—and the room door's locked."

The man almost babbled out the words in his extremity of fear.

"The terrace door Quick, Tucker!"—Jean gasped out the order. "Mr. Brennan's there . . . they've broken in the glass . . ."

Not waiting to hear the end of the sentence Tucker bolted out of the hall and along the terrace, while Jean leaned up against the doorway drawing long, shuddering breaths that seemed actually to tear their way through her throat and yet brought no relief to the agonised thudding of her heart. For the moment she was physically unable to run another yard.

But her mind was working with abnormal clarity and swiftness. This was her doing—hers. If she had not dismissed Nick that day when he had proposed taking Claire away with him, all this would never have happened Claire would have been safe—safe! But she had interfered, clinging to her belief that no real good ever came by doing wrong, and now her creed had failed her utterly. Nick's resistance of temptation was culminating in a ghastly tragedy that might have been avoided. To Jean it seemed in that moment as if her world were falling in ruins about her.

Sick with apprehension she almost reeled out again into the mocking summer sunlight, and, running as fast as the convulsive throbbing of her heart would let her, regained the far end of the terrace and peered through the door that led into Claire's room.

Its great panes were shattered. Jagged teeth and spikes of glass stuck out from the wooden framework, while here and there, dependent from them, were bits of cloth torn from the men's coats as they had scrambled through.

Within the room Jean could discern a confused hurly-burly of swaying, writhing figures—Blaise and Nick and the butler struggling to overpower Sir Adrian, who was fighting them with all the cunning and the amazing strength of madness. From beyond came the clamour of people battering uselessly at the door, the shrill, excited voices of the frightened servants who had collected in the hall outside the room.

For a few breathless seconds Jean was in doubt—wondered wildly whether Sir Adrian would succeed in breaking away from his captors. Then she saw Nick's foot shoot out suddenly like the piston-rod of an engine, and Sir Adrian staggered and came crashing down on to his knees. The other two closed in upon him swiftly, and a minute later he was lying prone on his back with the three men holding him down by main force.

With difficulty avoiding the protruding pieces of glass, Jean stepped into the room. Her first thought was for Claire, who now hung helpless and unconscious against the bonds that held her. But Blaise very speedily directed her attention to something of more urgent importance for the moment.

"Unlock that door," he called to her. "Quick!" He was still panting from the exertion of the recent struggle. "Get a rope of some sort!"

Jean turned the key and tore open the door leading into the hall. The little flock of servants gathered outside it overflowed into the room, frightened and excitedly inquisitive.

"Get some cord, one of you," commanded Jean authoritatively. "Anything will do if it's strong."

Two or three of the servants broke away from the main body and ran frantically in search of the required cord, glad to be of use, and very soon Sir Adrian, bound as humanely as his struggles rendered possible, was borne to his room and laid upon his bed.

"Ring up the doctor," ordered Blaise, as he assisted in the rather difficult process of conveying Sir Adrian upstairs. "Tell him to come to Charnwood as quickly as he can get here." And another eager little detachment of domestics flew off to carry out his bidding. The underfootman won the race for the telephone by a good half-yard, and, in a voices which fairly twittered with the agitating and amazing news he had to impart, transmitted the message to the doctor's parlour-maid at the other end of the wire, adding a few picturesque and stimulating details concerning the struggle which had just taken place—and which, apparently, he had perceived with the eye of faith through the wooden panels of the locked door.

Meanwhile Nick and Jean had turned their attention towards releasing Claire, who, as the last of her bonds was cut, toppled forward in a dead faint into the former's arms.

A second procession wended its way upstairs, Nick bearing the slight, unconscious figure in his arms while Jean and a kindly-faced housemaid followed.

"Her ladyship's maid is out, miss," volunteered the girl. "But perhaps I can help?"

Jean smiled at her, the frank, friendly smile that always won for her the eager, willing service of man and maid alike.

"I'm sure you can," she said gently. "As soon as we can bring her ladyship round, you shall help me undress her and put her to bed."

In a few minutes Claire recovered consciousness, but she was horribly shaken and distraught, crying and clinging to Jean or to the housemaid —who was almost crying, too, out of sympathy—like a child frightened by the dark.

Jean, understanding just what was needed, shepherded Nick to the door of the room, where he lingered unhappily, his anxious gaze still fixed on the slender shrinking figure upon the couch.

"Don't worry, Nick," she said assuringly. "She'll be all right; it's only reaction. But I know what she wants—she wants a real mother-person. Go down and ring up Lady Anne, will you, and ask her to come over in the car as quickly as she can."

Nick nodded; the idea commended itself to him. His "pale golden narcissus," so nearly broken, would be safe indeed with the kind, comforting arms of his mother about her.

It was an intense relief to Jean when Lady Anne arrived and quietly and efficiently took command of affairs. And there was sore need for her unruffled poise and capability throughout the night that followed.

Claire, nervous and utterly unstrung, slept but little, waking constantly with a cry of terror as in imagination she relived the ordeal of the afternoon, while in the big bedroom across the landing, where her husband lay, the grim shadow of death itself was drawing momentarily closer.

By the time the doctor had arrived in answer to the summons sent, there seemed small need for the strong cords with which Sir Adrian's limbs were bound. The wild fury of the afternoon's struggle had thoroughly exhausted him, and he lay, propped up with pillows, apparently in a state of stupor, breathing very feebly.

"Heart," the doctor told Tormarin after he had made a swift examination. "I've known for months that Sir Adrian might go out at any moment. His heart was already impaired, and, of course, he's drugged for years. He may recover a little, but if, as I think is highly probable, there's any recurrence of the brain disturbance—why, he'll not live out a second paroxysm. The heart won't stand it."

Tormarin endeavoured to look appropriately shocked. But the doctor was a man and an honest one, and not even professional etiquette prevented his adding, with a jerk of his head in the direction of Claire's bedroom:

"It would be a merciful deliverance for that poor woman. There's a strain of madness in the Latimers, you know. And"—with a shrug—"naturally Sir Adrian's habits have accentuated it in his own case."

But the doctor was mistaken in calculations. Sir Adrian's constitution was stronger than he estimated. As Nick had once bitterly commented to Jean, the man was like a piece of steel wire, and two dreadful outbreaks of maniacal fury had to be endured before the wire began to weaken.

During the course of the first paroxysm it was all the four men could do to restrain him from leaping from the bed and rushing out of the room, since, during the period of quiescence which had preceded the doctor's arrival, a mistaken feeling of humanity had dictated the loosening of the cords which bound him.

He fought and screamed, uttering the most horrible imprecations, and his evil intent towards the woman who was his wife was unmistakable. With her husband free to work his will, Claire's life would not have been worth a moment's purchase.

In the period of coma that succeeded this outbreak Sir Adrian was again secured, as mercifully as possible, from any possibility of doing his wife a mischief, and the second paroxysm which convulsed the bound and shackled madman was very terrible to witness.

Like its predecessor, this attack was followed by a stupor, during which Sir Adrian appeared more dead than alive.

He was palpably weaker, restoratives failing to produce any appreciable effect, and towards morning in those chill, small hours when the powers of the body languish and fail, the crazed and self-tormented spirit of Adrian Latimer quitted a world in which he had been able to perceive none of those things that are just and pure, and lovely, and of good report, but only distrust and malice and, finally, black hatred.

A fortnight had come and gone. Sir Adrian's body had been laid to rest in Coombe Eavie churchyard, and Claire, in the simplest of widow's weeds, went about once more, looking rather frail and worn but with a fugitive light of happiness on her face that was a source of rejoicing to those that loved her.

(To Be Continued.)

Benefit Canadian Ports

As a result of the six cents a bushel preference granted Canada by the United Kingdom in the agreement signed at the Imperial Economic Conference, millions of bushels of Canadian wheat that has formerly been shipped via the United States will now be exported from Canadian ports, J. H. Rainville, president of the Montreal harbor commission stated.

M'Nabb (who has been abroad a number of years)—By the way, M'Allister, hear none of your fine daughters have gone off yet.

M'Allister—No, but I'm sure it's not for the want of powder, anyhow!

Hunter-Bay Coppermine River Map

Farthest North Map Of the National Topographic Series

There is a great deal of popular interest in the rich radium and silver discoveries recently made at Great Bear Lake, and in order to assist in the exploration and development of these resources the Topographical Survey, Department of the Interior, Ottawa, has just published a new map sheet known as the Hunter Bay-Coppermine River sheet of the National Topographic series. It is the farthest north map of this series yet issued, extending from latitude 66 to latitude 67, and in longitude from 114 degrees to 118 degrees. It was plotted from aerial photographs taken by the Royal Canadian Air Force in 1931. As a portion of the area in the north-east corner was not covered by these photographs, that part perforce still remains blank.

The area covered is part of the Canadian Archean shield, also known as the Laurentian plateau. It is underlain by rocks of pre-Cambrian age has a rocky, irregular, hummock surface, with relief rarely exceeding a few hundred feet. The hollows are filled with lakes which are almost innumerable. This area lies on the edge of the Laurentian plateau, the western boundary of which follows approximately Slave River, the north arm of Great Slave Lake, and a line extending north to Great Bear Lake. West of this boundary lies the Mackenzie lowland, an extension northward of the great central plain of North America.

This region is part of the district of Mackenzie, the area of which is given as 527,490 square miles; Mackenzie is one of the districts of the North West Territories, the total area of which is 1,309,682 square miles, over one-third of the whole area of Canada. The present map includes about 7,600 square miles. The Coppermine River crosses the sheet from south to north, while on the west is shown a portion of the east arm of Great Bear Lake.

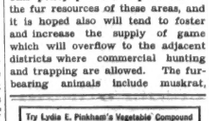

The line of demarcation between the forested area and the great treeless Northern Plains crosses this region and is indicated by a green colour over the wooded part. The Mackenzie district forests are a northerly extension of the forest belt of western Canada. The northerly limit is not determined by climate alone but by soil conditions and to a very large extent by drainage also. The line of demarcation between wooded and treeless areas is very irregular. Here and there, far beyond the main forest body, fringes of trees are found growing along the banks of the Coppermine River and some of its tributaries. Isolated clumps of trees flourish in favourable localities, white and black spruce and birch being the predominate species of trees, while willows and alders form a considerable underbrush. As the northern limit of woods is approached the species are more or less stunted in growth, and curious instances of trees many years old but short and squat may be found.

Beyond the wooded areas lie the Great Northern Plains, formerly known as the "barren grounds," so named by Samuel Hearne who made an exploration in 1770-72 overland from Churchill to the Coppermine River and the sea-coast at its mouth, returning by way of Great Slave Lake. He no doubt so designated this type of country on account of its lack of trees, but it is not in any sense barren. Wherever sufficient soil has accumulated, abundance of plant life is found every season. The ground is almost everywhere covered with a thick soft carpet of various kinds of mosses and lichens. In addition there are many species of flowering plants during the short Arctic season. About the middle of June these are in full bloom. Beautiful blue lupines sometimes cover acres of ground. Yellow Arctic poppies, white and red saxifrages, blue forget-me-nots and many other species of attractive plants are equally as plentiful. Completing the vegetation are the coarse grasses and sedges, the green of which combined with the great variety of coloured flowers makes a landscape of wonderful beauty.

The part of this country lying between Coppermine River and Great Bear Lake is included in the Yellowknife Game Preserve, one of the four areas set apart by the Government as exclusive hunting grounds for the native Indians, Eskimos and half-breeds. This policy prevents exploitation of the fur resources of these areas, and it is hoped also will tend to foster and increase the supply of game which will overflow to the adjacent districts where commercial hunting and trapping are allowed. The fur-bearing animals include muskrat, beaver, marten, ermine, mink and fox, while great herds of caribou range over the Northern Plains feeding on the grasses, sedges and tender shoots of willows and dwarf birches and on the lichens and mosses during the long winters.

Of chief interest at the present time, however, is the remarkable richness of the mineral discoveries at Echo Bay and vicinity. Rich deposits of pitchblende, the most important ore of radium, have been located at and near Labine Point. Not less important than the pitchblende deposits are the discoveries of remarkably rich native silver deposits. When it is considered that Echo Bay is over 1,100 miles north of the latitude of Winnipeg, one may have some idea of the problems to be met and overcome in this new mining centre. Copies of the new map can be obtained for a nominal price upon application.

More Diversification Needed

American Professor Gives Advice To Farmers Of Canada

Warning Canadians to beware of optimistic estimates of the future increased consumption of wheat and counselling a greater diversion from cereal crops to other products, Dr. R. M. MacVicar, of Columbia University, New York, addressed the Canadian Institute on Economic and International Affairs at Orillia, Ont.

"The world's consumption of wheat fell 4 per cent. between 1913 and 1930, he said. The world's supply of certain commodities exceeds the demand. I do not see why Canada should not produce a greater variety of the finer products.

Referring to the Imperial Conference, he said "it would be very unfortunate if it should lead to the creation of greater barriers between Canada and the United States. Greater trade reciprocity between England and Canada would be more effectively attained by lowering barriers between them than by raising greater barriers between them and the rest of the world."

THE RHYMING OPTIMIST

—By Aline Michaelis—

OF BEAUTY ALWAYS

Of beauty always has the poet sung,
Of loveliness of glance, or line, or scent;
The silver stars against night's shadow strung,
The young moon dangling in the firmament;
The rose, the lark, and mounting wave, and mist;
The shining beaches swept with golden light;
Rare chrysoprase, and pearls, and amethyst
Make warp and woof of every bard's delight.

And he has sought for beauty, till he finds
Some trace of it in even the lowliest place;
Its petals strewn where every roadway winds,
Its fleeting look on each familiar face.
He has become a prophet and a seer
Whose quest of beauty brings it ever near.

Britisher To Explore Stratosphere

Designs Balloon To Reach Height Of Seventeen Miles

Oswald Short, famous British air pioneer, is designing a balloon to explore the stratosphere calculated to reach a height of 17 miles, the United Press has learned.

Prof. August Piccard, the Belgian scientist, and the first man to enter the stratosphere, reached an altitude of approximately 10½ miles in his recent flight.

Short's balloon will carry three scientific observers in a hermetically sealed aluminum ball. It will carry special wireless equipment possibly strong enough for world-wide broadcasting.

Find Rare Tablets

Two rare Ostraca tablets on which were inscribed votes cast 2,400 years ago by Greek citizens in Ostracism proceedings against Aristides and Themistocles, Greek statesmen, have been unearthed in the ancient market place at Athens, Dr. T. Leslie Shear, of the department of archaeology of Princeton University, was informed by cable.

The average weight of a head of hair is from 5 to 12 ounces.

An Old Industry

House Thatching Still Carried On In Rural England

The following article is by H. Hoggins, whose family have been house thatchers for more than three generations:

Thatching, one of the oldest industries in England, is still carried on, though in a lesser degree than in the past.

The reason why many thatched roofs remain, is that most of the walls and roof timbers of old houses are not strong enough to withstand the weight of a tiled or slated roof, without a lot of strengthening.

In the early days of "wattle and daub" and half-timbered houses, thatch was greatly in vogue. Many of these old houses were apparently built around a grandfather clock, and, in the majority of cases, were incomplete without a thatched roof.

Thatchers in those days used wheat stubble—the short straw which remained after the sickles (and later reaping machines) had cut away the corn. This stubble was left in the fields until the first frost, when the farmer sent his men to "bag" it. Taking scythes or sticks, they broke it off while it was brittle, afterwards storing it for use on cottages, farm buildings, and so on.

The thatcher of today follows most of the old customs, with the exception that he uses rye or wheat straw in the length as it leaves the trussing machine. Where such straw is extra long it is cut in half before being used, and a safer method of securing it has been evolved, particularly on modern houses of six to sixteen rooms.

Another kind of thatching greatly in demand today is that for which reeds are used. This makes a very serviceable roof, and lasts indefinitely.

Yet another kind of thatching is done with heather, cut when in bloom, and a very beautiful effect is obtained when this method is used on any small ornamental roof. Heather is not advised for large roofs as it is not a very good water resister, and for that reason an undercoat of other material is used with heather thatch.

Prince Has Volumes Of Press Clippings

Collection Is One Of Largest and Most Interesting In World

The Prince of Wales must have one of the largest, and most interesting, collections of press clippings in the world.

Another volume has been added, bringing the total to over 40, bound in half-morocco, each of which contains nearly 7,000 cuttings.

Wherever the Prince goes throughout the whole world, his movements are closely followed by a press clipping bureau, which collects reports from newspapers of every nationality. Each half-year a selection of these is made and they are bound.

The collection covers the life of the Prince from 16 and every public incident of importance since then is reported. By the time he was 27 there were more clippings in the Prince's collection than in that of the late King Edward, which covered his lifetime.

Women Explore Rockies

Rare Plants and Insects Found In Northern British Columbia

Unknown glaciers and valleys in northern British Columbia have been explored by two daring Philadelphia society women, who recently returned to Edmonton.

The explorers were Mrs. J. Norman Henry and her daughter, Miss Josephine de N. Henry. Last year they were in the party headed by Dr. J. N. Henry that discovered the tropical valley in the northern wilderness.

Many rare specimens of plant and insect life brought back by the two women will be presented to the Academy of Natural Sciences in Philadelphia. In addition, they obtained a large number of photographs of flowers, game and the surrounding country.

Men Frequent Beauty Shops

The old days when men tried to be the beautiful sex may return, declare members of the American Cosmeticians Association. They say males, including athletes, laborers and traffic cops, are visiting beauty parlors more and more for facials, eye brow trims, and permanent waves.

Little Helps For This Week

"My peace I give unto you."—John xxv. 27.

Then leave thy vain attempts
To seek for peace;
The world can never give
One soul's release;
But in thy Saviour's heart
Securely dwell,
No pain can harm thee bid
In that sweet cell.
—Adelaide Anne Proctor.

He says Himself that His peace is not what the world giveth. It does not come from anything in this life; it cannot be taken away by anything in this life; it is wholly divine. As a white dove looks brighter and fairer against a black thunder-cloud, so Christ's peace is brightest and sweetest in darkness and adversity.
—Harriet Beecher Stowe.

Taught Herself To Speak

Deaf Mute Watched Lip Movements Of Normal People

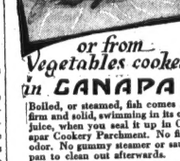

Born a deaf mute, but now able to speak, Mlle. Suzanne Lavaud, aged 28, of Paris, was a candidate for the degree of doctor of literature at the Sorbonne recently. Mlle. Lavaud, who taught herself to speak by watching and imitating the lip movements of normal people, had to answer questions on her thesis put to her verbally by the examining professor. Her thesis dealt with Maria Leneru, a French dramatist, who was herself a deaf mute.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

Has Eye For Money

Rags, a spaniel owned by James Thompson, of Inman, Neb., has an eye for money. He found a pocketbook containing $15 that James Coventry had lost, and then found a pocketbook containing $39 that Thomas Chalput lost two years ago.

There is NO ODOR from FISH

or from Vegetables cooked in CANAPAR

Boiled, or steamed, fish comes out firm and solid, swimming in its own juice, when you seal it up in Canspar Cookery Parchment. No fishy odor. No gummy steamer or saucepan to clean out afterwards.

And vegetables are simply delicious. Using Canspar you can cook three at once in the same pot over one burner turned low. Canspar acts on them as it does on fish. Retains all the mineral salts and flavor.

Fat and juices from meat won't burn if you line your roasting pan with Canspar. No pan-scraping afterwards.

Canspar only costs 25 cents for a large envelope. You can use each sheet repeatedly because it won't absorb odors. Makes a perfect dish cloth because it is silky, strong, and doesn't spread lint.

Special Offer

CANAPAR is made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box. Most grocers, druggists and department stores have Canapar on sale, but if yours hasn't send coupon direct to the makers and we'll give you a new and unique book entitled "Leftovers", containing one hundred recipes as a bonus for your trouble.

Appleford Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25c for which please send me one full size package of *CANAPAR COOKERY PARCHMENT* and your 100 recipes for "Leftovers".

No better corrective exists today for BAD COMPLEXION and ACID STOMACH

Sold everywhere in 25c and 75c red pkgs.

CARTER'S LITTLE PILLS

Dry Goods and Ladies Wear

New Felt Hats For Autumn Days

A new shipment including small and medium brim styles and snug-fitting turbans, etc. Made of fine quality fur felt in all the wanted shades.

$1.75, $1.95 and $2.95

Dresses For Fall

Frocks that follow the Fall style trend to slim Silhouettes; cut on straight lines or bias effects. Developed in the finest silk Crepes in shade of brown, blue, wine, green and black. Unusual neck treatments, many with contrasting collars and ties. Others effectively trimmed with novelty bows and open work. Sizes 14 to 42. **Priced $10.50 to $23.50**

Wool Frocks For Autumn

Becoming fashions for the cooler days for sports, street or business wear. Trim fitting one-piece dresses of softest wools in plain or fancy weaves. New necklines add a novel touch that will make one feel "dressed-up" for practically any daytime occasion. Sizes 14 to 22. **$6.95 to $11.50**

Fur Trimmed Coats $32.50 to $45.00

Fashioned of rich new cloths, huge fur collars that stand away from the neck, and fur trimmed sleeves giving a distinctive appearance. All the new Fall shades represented. Assorted sizes.

New Fall Coats Priced $15.95

Stunning coats with fur-trimmed collars and cuffs, fashioned of smooth broadcloths or fancy coatings. Interlined with chamois to waist. Colors Brown. Navy, Green and Black.

BRITAIN AGAIN WORLD LEADER

London—with the achievements of the Ottawa Economic Conference behind her and those of the World Economic Conference yet to come, Britain faces a winter which she is told by some of her bankers and financiers will give her the unique opportunity for world leadership. She has to play the biggest part in bringing to an end, or at least mitigating the economic war now raging between countries who want to make themselves economically self-sufficient and those who wish to restore trade to its old international basis.

Britain is now well qualified to make the attempt. Twelve months ago she was in the midst of her financial crisis. The other nations he's lost confidence in sterling and gold was draining away so rapidly that on September 20 the directors of the Bank of England had to ask Premier MacDonald's government to relieve them of the obligation to pay gold for their own notes. Next day Britain went off the gold standard.

Since then all the world has learned how stable, in spite of such a shock, Britain's financial and economic structure really is. The maintenance of the domestic buying-power of the pound, the successful conversion of the $10,000,000,000 war loan, and the restoration of international confidence in British finance have all been resounding achievements.

"If we compare position now with that of the rest of the world," said Neville Chamberlain, the chancellor of the exchequer, before he went to Ottawa, "there is a good deal to give us encouragement."

And on the purely business side, though trade has diminished rather than increased and the unemployed armies have now climbed to nearly three million people, J. M. Keynes, the famous economist, finds much cause for reassurance.

"Over a wide range of characteristic activities," he says, "Britain is again the cheapest producer. I believe that our textile industries could now produce more cheaply than their chief competitors over a wide range of qualities. We can run ships today at a lower cost than anyone else and we can bid for the best part of the world's export trade in motor cars and motor trucks. All this will tell increasingly with time."

Britain's own outlook, therefore, is as good as can be expected considering the state of the rest of the world. Financially, the conversion loan has helped borrowers—government, municipal or corporation. Dearer capital has been replaced by cheaper—a gain to industry when it is ready to take fuller advantage of it. Securities have benefited and a better "atmosphere" created throughout the banking world. With the opening of the capital market millions of gold kept unproductively in London for foreign owners will be released; and funds held on deposit may be turned to better uses. An era of "cheap money" is obviously ahead.

Trade, however, does not respond as everyone wishes it should. And it is in curing the artificial conditions which make for depression that Britain's opportunity lies.

All the nations, as the review of the Westminster Bank points out are still in the grip of fears engendered by the war and are striving to make themselves economically self-sufficient. They ignore the truth that nature has spread her resources throughout the world with a complete disregard of its political frontiers. That is why they erect tariff walls and try to produce everything they require regardless of the readiness of other nations to supply them.

"What part should this country play if within the next few months at the World Conference, the decisive moment arrives upon which the fortunes of a whole generation may depend?" asks the bank review. "Her example must necessarily be a major factor, since in the past 12 months she, almost alone among the great nations, has drawn determinedly on her immense reserves of national character and sound statesmanship to meet an unprecedented situation.

"Already her sacrifices in the balancing of her budget have borne fruit in the reduction of her real burden of her internal debt. Her prestige never stood higher internationally. Though she cannot hope to carry through any world policy to which other great powers are opposed, it is equally true that no plans for the solution of the world's difficulties can have vital force without her willing participation.

"The prohibitive tariffs, the exchange restrictions and other devices which are throttling trade today are ostensibly emergency defensive measures. But in effect they only intensify the very crisis they are designed to counteract."

So it is just here that Britain can most usefully use her immense influence. If she can bring about, says the bank in effect, a workable compromise between unrestricted exchange of merchandise, services and capital on the one hand, and a minimum measure of economic self-sufficiency among the nations on the other she will have justified herself as a world-leader and at the same time helped to bring back prosperity
